

Ontological Requirements for Navigating Philosophical Resources

Michele Pasin, Enrico Motta, Zdenek Zdrahal
{ m.pasin, e.motta, z.zdrahal } @ open.ac.uk

Summary

1. Context, Generic approach & Requirements
2. Ontology Walkthrough
3. Modeling patterns for navigation (III)
4. Conclusions

Background and rationale

- PhiloSURFical (2005): learning through semantic navigation
 - Annotation of learning materials *by means of* a domain ontology
 - Reasoning on annotated resources
 - Dynamic reorganization according to different perspectives
 - Mechanisms for contextual navigation
 - Tools for providing not answers, but documents!
- Other notable projects
 - InPhilo Project (USA, 2007)
 - Ontological backbone for the Stanford Encyclopedia of Philosophy
 - Funded by the *National Endowment for the Humanities Digital Humanities Initiative*
 - Discovery Project (Europe, 2006)
 - Generic framework for collaborative annotation/navigation in the *philo-SW*
 - Funded by the EU EcontentPlus Grant (2M)

What we'd like: a vision...

7

What we cannot speak about we must pass over in silence.

Ludwig Wittgenstein 1889-1951,
Tractatus Logico-Philosophicus

6.2

Mathematics is a logical method. The propositions of mathematics are equations, and therefore pseudo-propositions.

Textual

empiricism platonism
logicism
realism formalism

Theoretical

ph.of
mathematics

ph.of language

Theoretical

epistemology
ph.of logic

Interpretative

Max Black 1909-1988,
Commentary on the Tractatus

Comparative

B. Russell, 1872-1970

Cambridge, 1920-1930

F. Ramsey, 1903-1930

G.E. Moore, 1873-1948

Generic Approach

A Pragmatic Perspective

- Ontologies are not about truth or beauty.
- They are agreements, made in a social context, to accomplish some objectives.
- It's important to understand those objectives, and be guided by them.

Adapted from Gruber, 2003

The Semantic Web is about sharing and accessibility: REUSE!

Requirements:

Varying
granularity

e.g. a philosophy is unique,
but still within a tradition

Uncertainty

e.g. the birth of Heraclitus

Viewpoints

e.g. theories, schools and
other philosophical ideas

Contradictory
information

e.g. concurring opinions on
the same subject

Interpretation
events

e.g. "the paragraph is
about concept X"

Historical
events

e.g. publication of a book,
meeting, work conception

Information
objects

e.g. texts, paintings,
musical works and their
contents

Requirements: approach

Contrad. information

Interpretation events

Varying granularity

Viewpoints

Information Objects

Historical events

Uncertainty

Onto Walkthrough: temporal entities

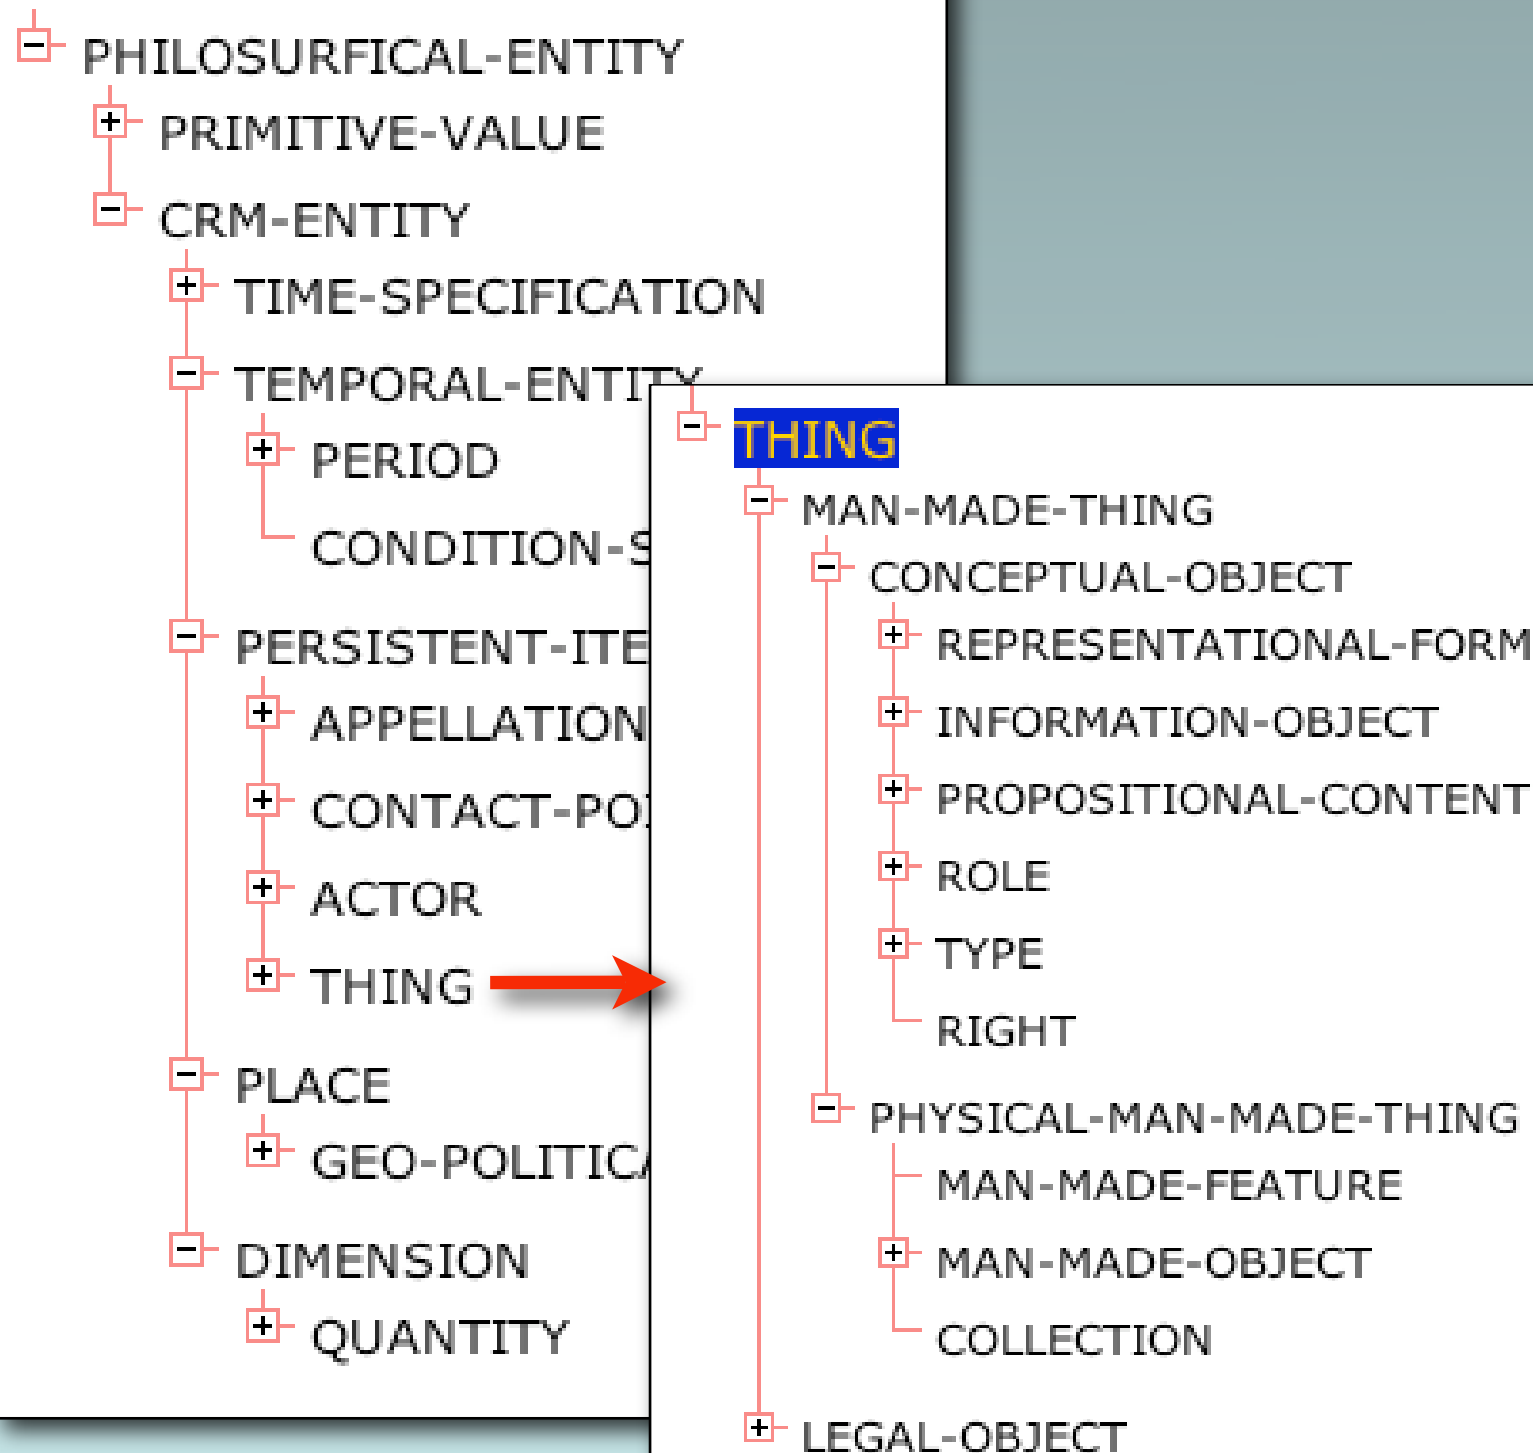

Onto Walkthrough: temporal entities

Onto Walkthrough: conceptual objects

Onto Walkthrough: conceptual objects

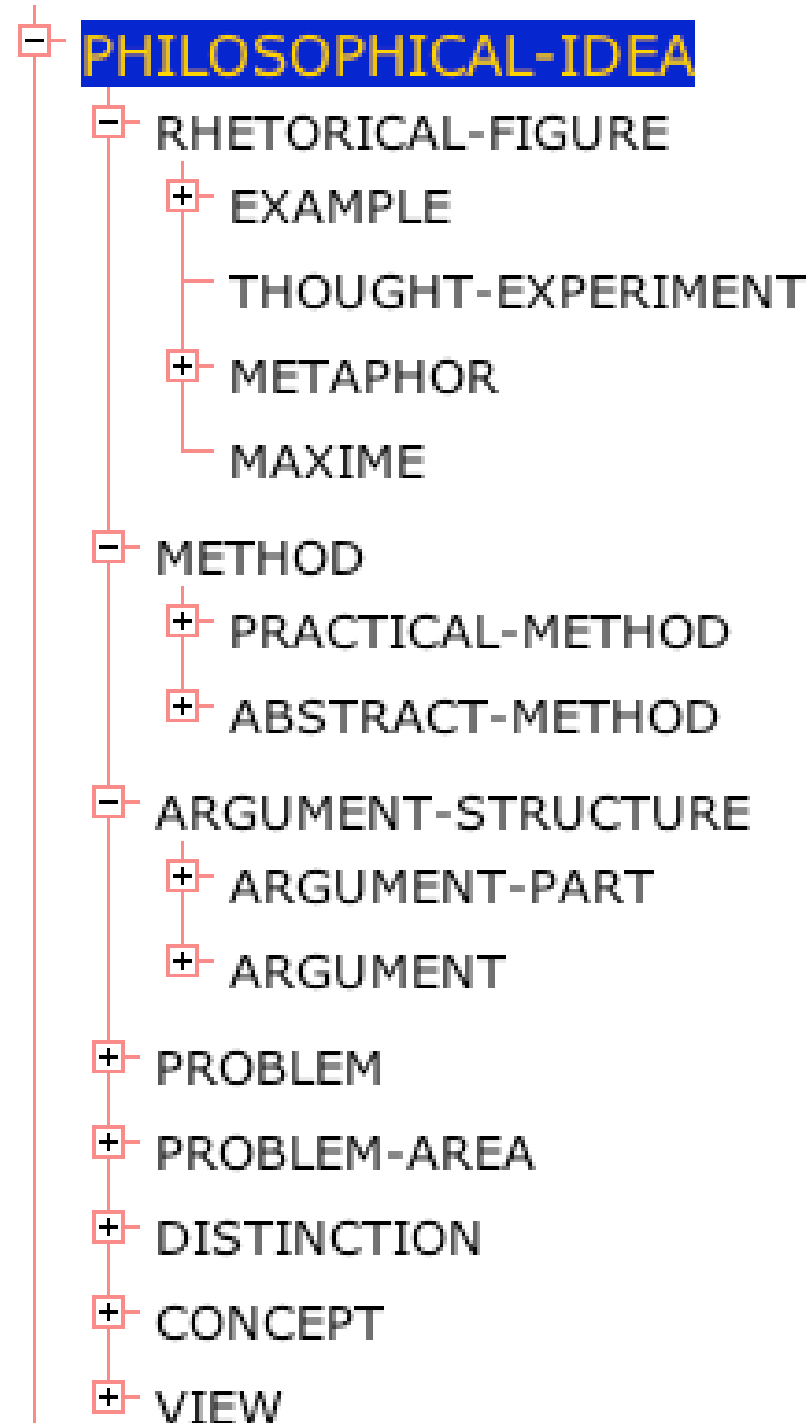

Onto Walkthrough: conceptual objects

- PHILOSOPHICAL-ENTITY
 - + PRIMITIVE-VALUE
 - CRM-ENTITY
 - + TIME-SPECIFICATION
 - TEMPORAL-ENTITY
 - + PERIOD
 - CONDITION-S
 - PERSISTENT-ITEM
 - + APPELLATION
 - + CONTACT-POINT
 - + ACTOR
 - + **THING** →
 - PLACE
 - + GEO-POLITICAL
 - DIMENSION
 - + QUANTITY

- **THING**
 - MAN-MADE-THING
 - CONCEPTUAL-OBJECT
 - + REPRESENTATIONAL-FORM
 - + INFORMATION-OBJECT
 - + PROPOSITIONAL-CONTENT →
 - + ROLE
 - + TYPE
 - RIGHT
 - PHYSICAL-MAN-MADE-THING
 - MAN-MADE-FEATURE
 - + MAN-MADE-OBJECT
 - COLLECTION
 - + LEGAL-OBJECT

- **PROPOSITIONAL-CONTENT**
 - PRODUCT-PROPOSITION
 - + PHILOSOPHICAL-IDEA
 - + PHILOSOPHICAL-WORK
 - PAINTING
 - POEM
 - NOVEL
 - DESIGN-PROPOSITION
 - SPECIFICATION
 - SYMBOL
 - DRAMA
 - + PIECE-OF-MUSIC
 - PROCEDURE

Onto Walkthrough: philosophical ideas

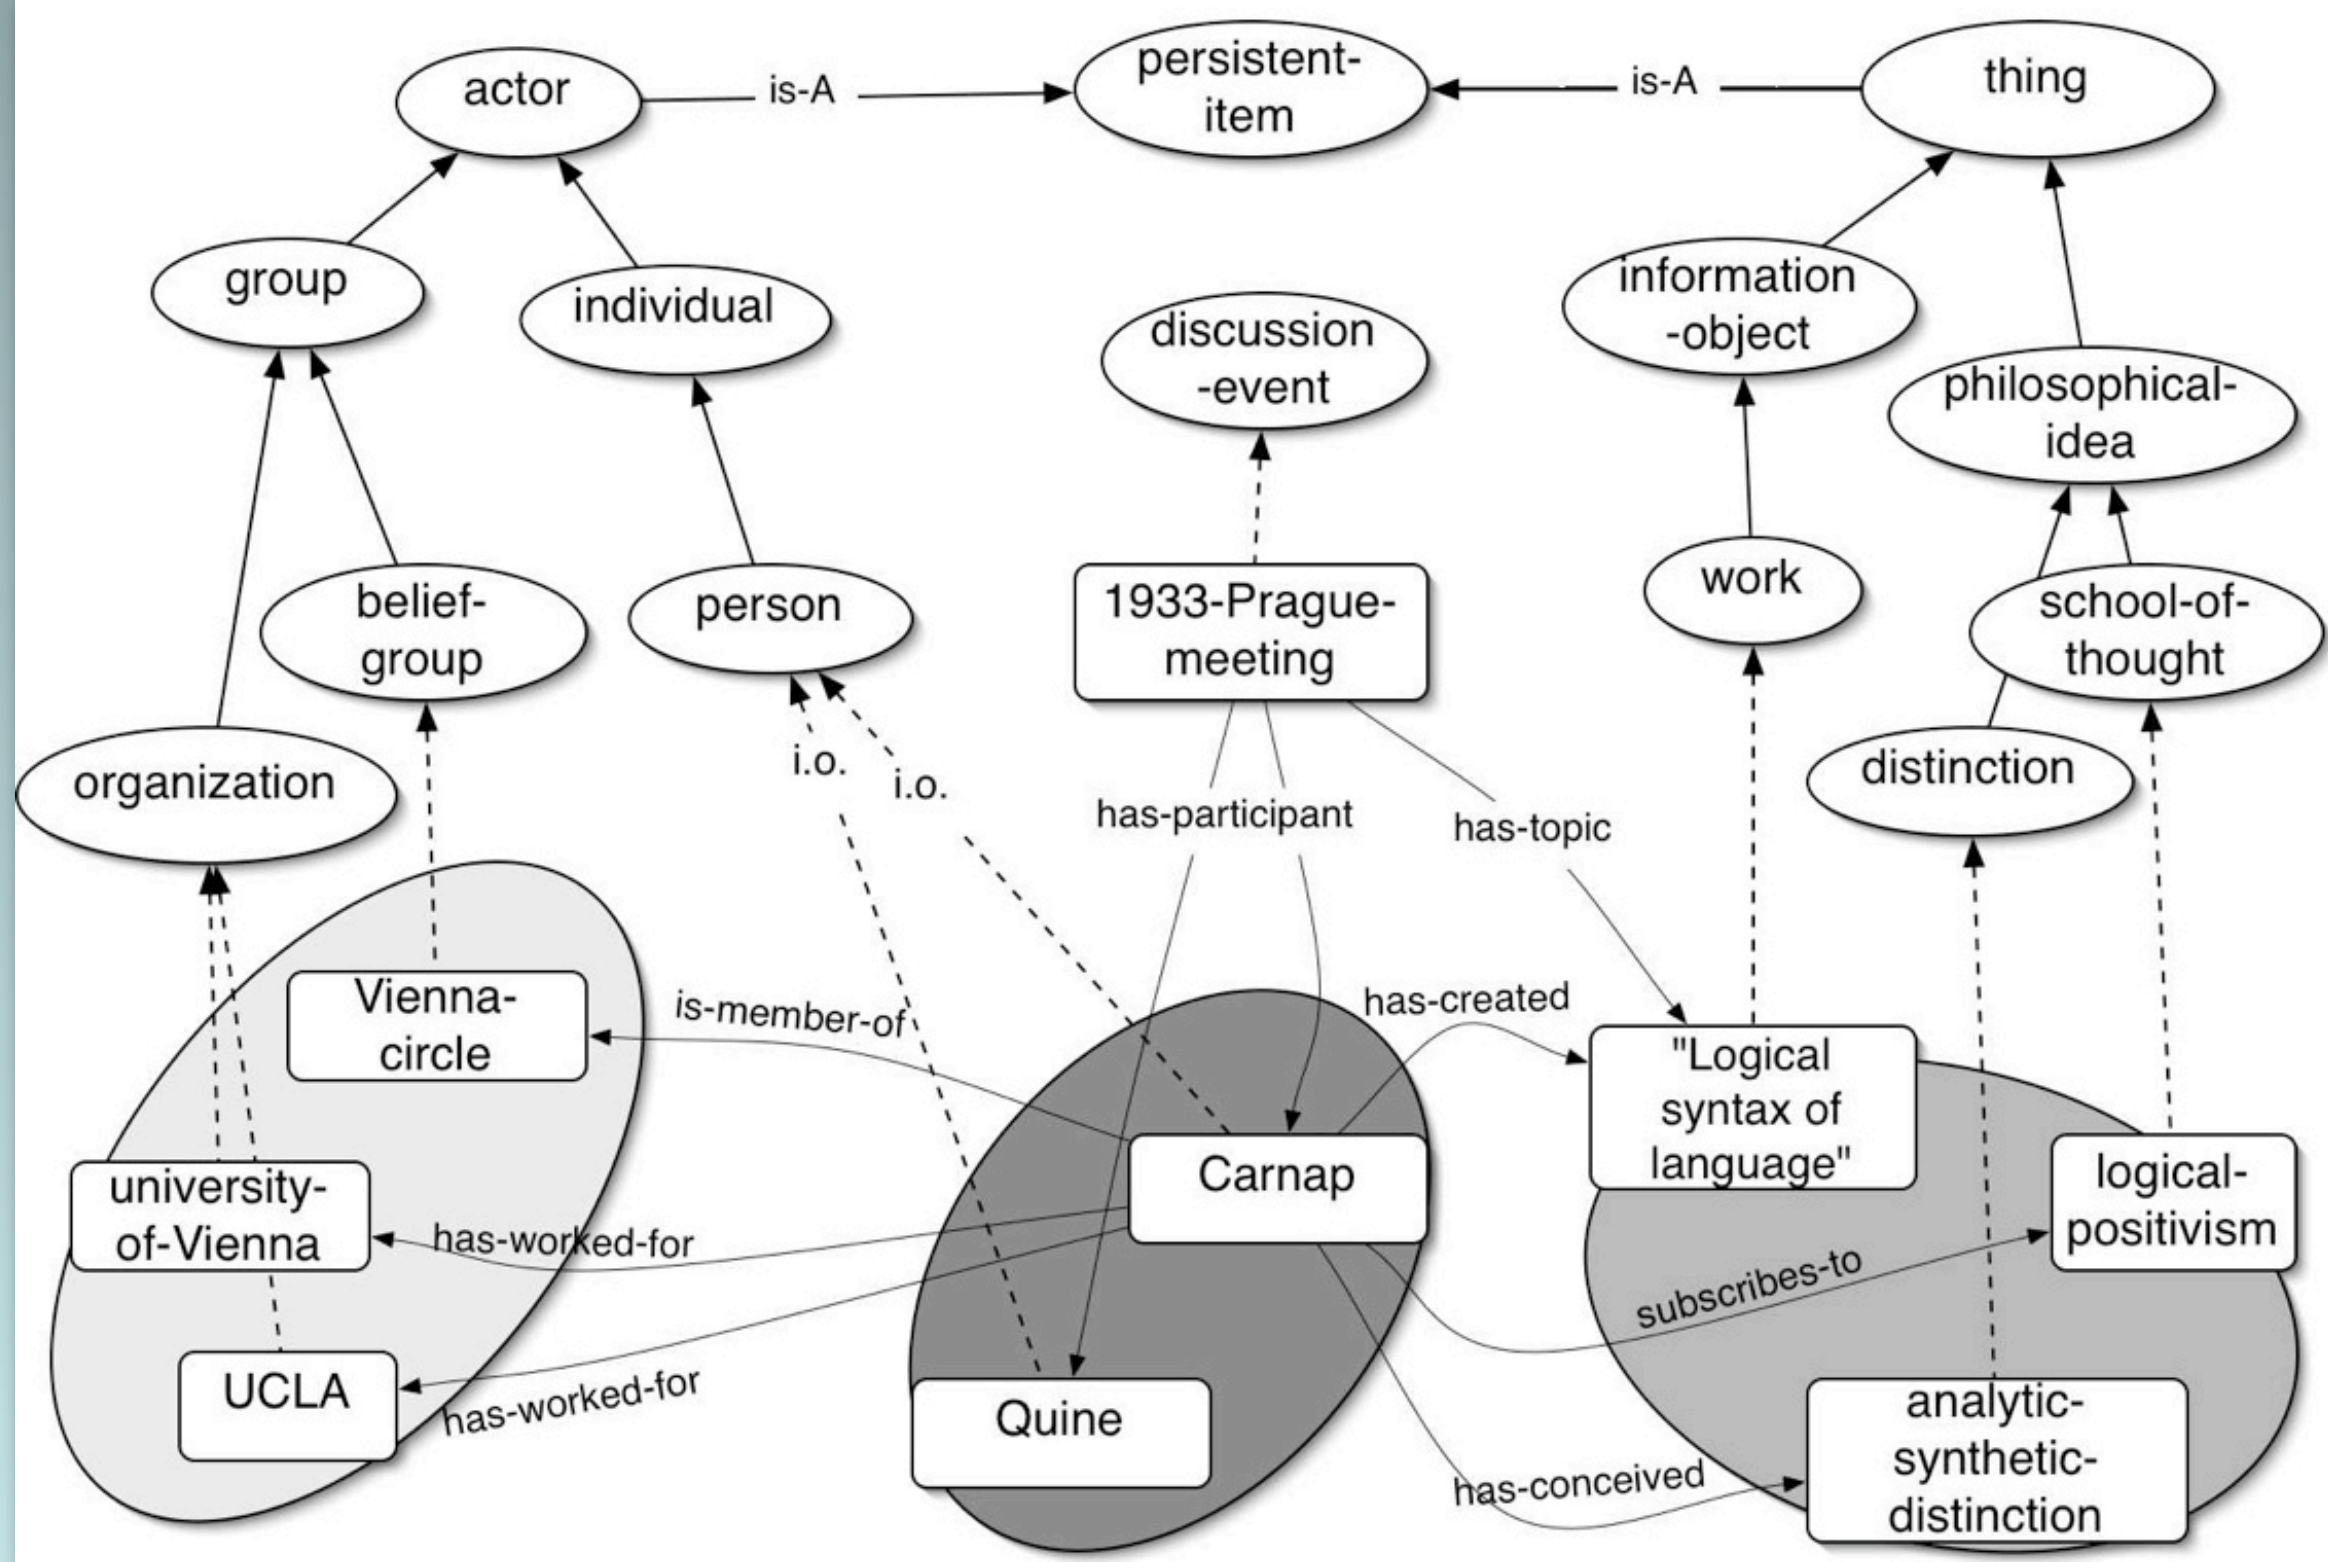

- **Constructivistic** approach:
'pragmatic minimalism'

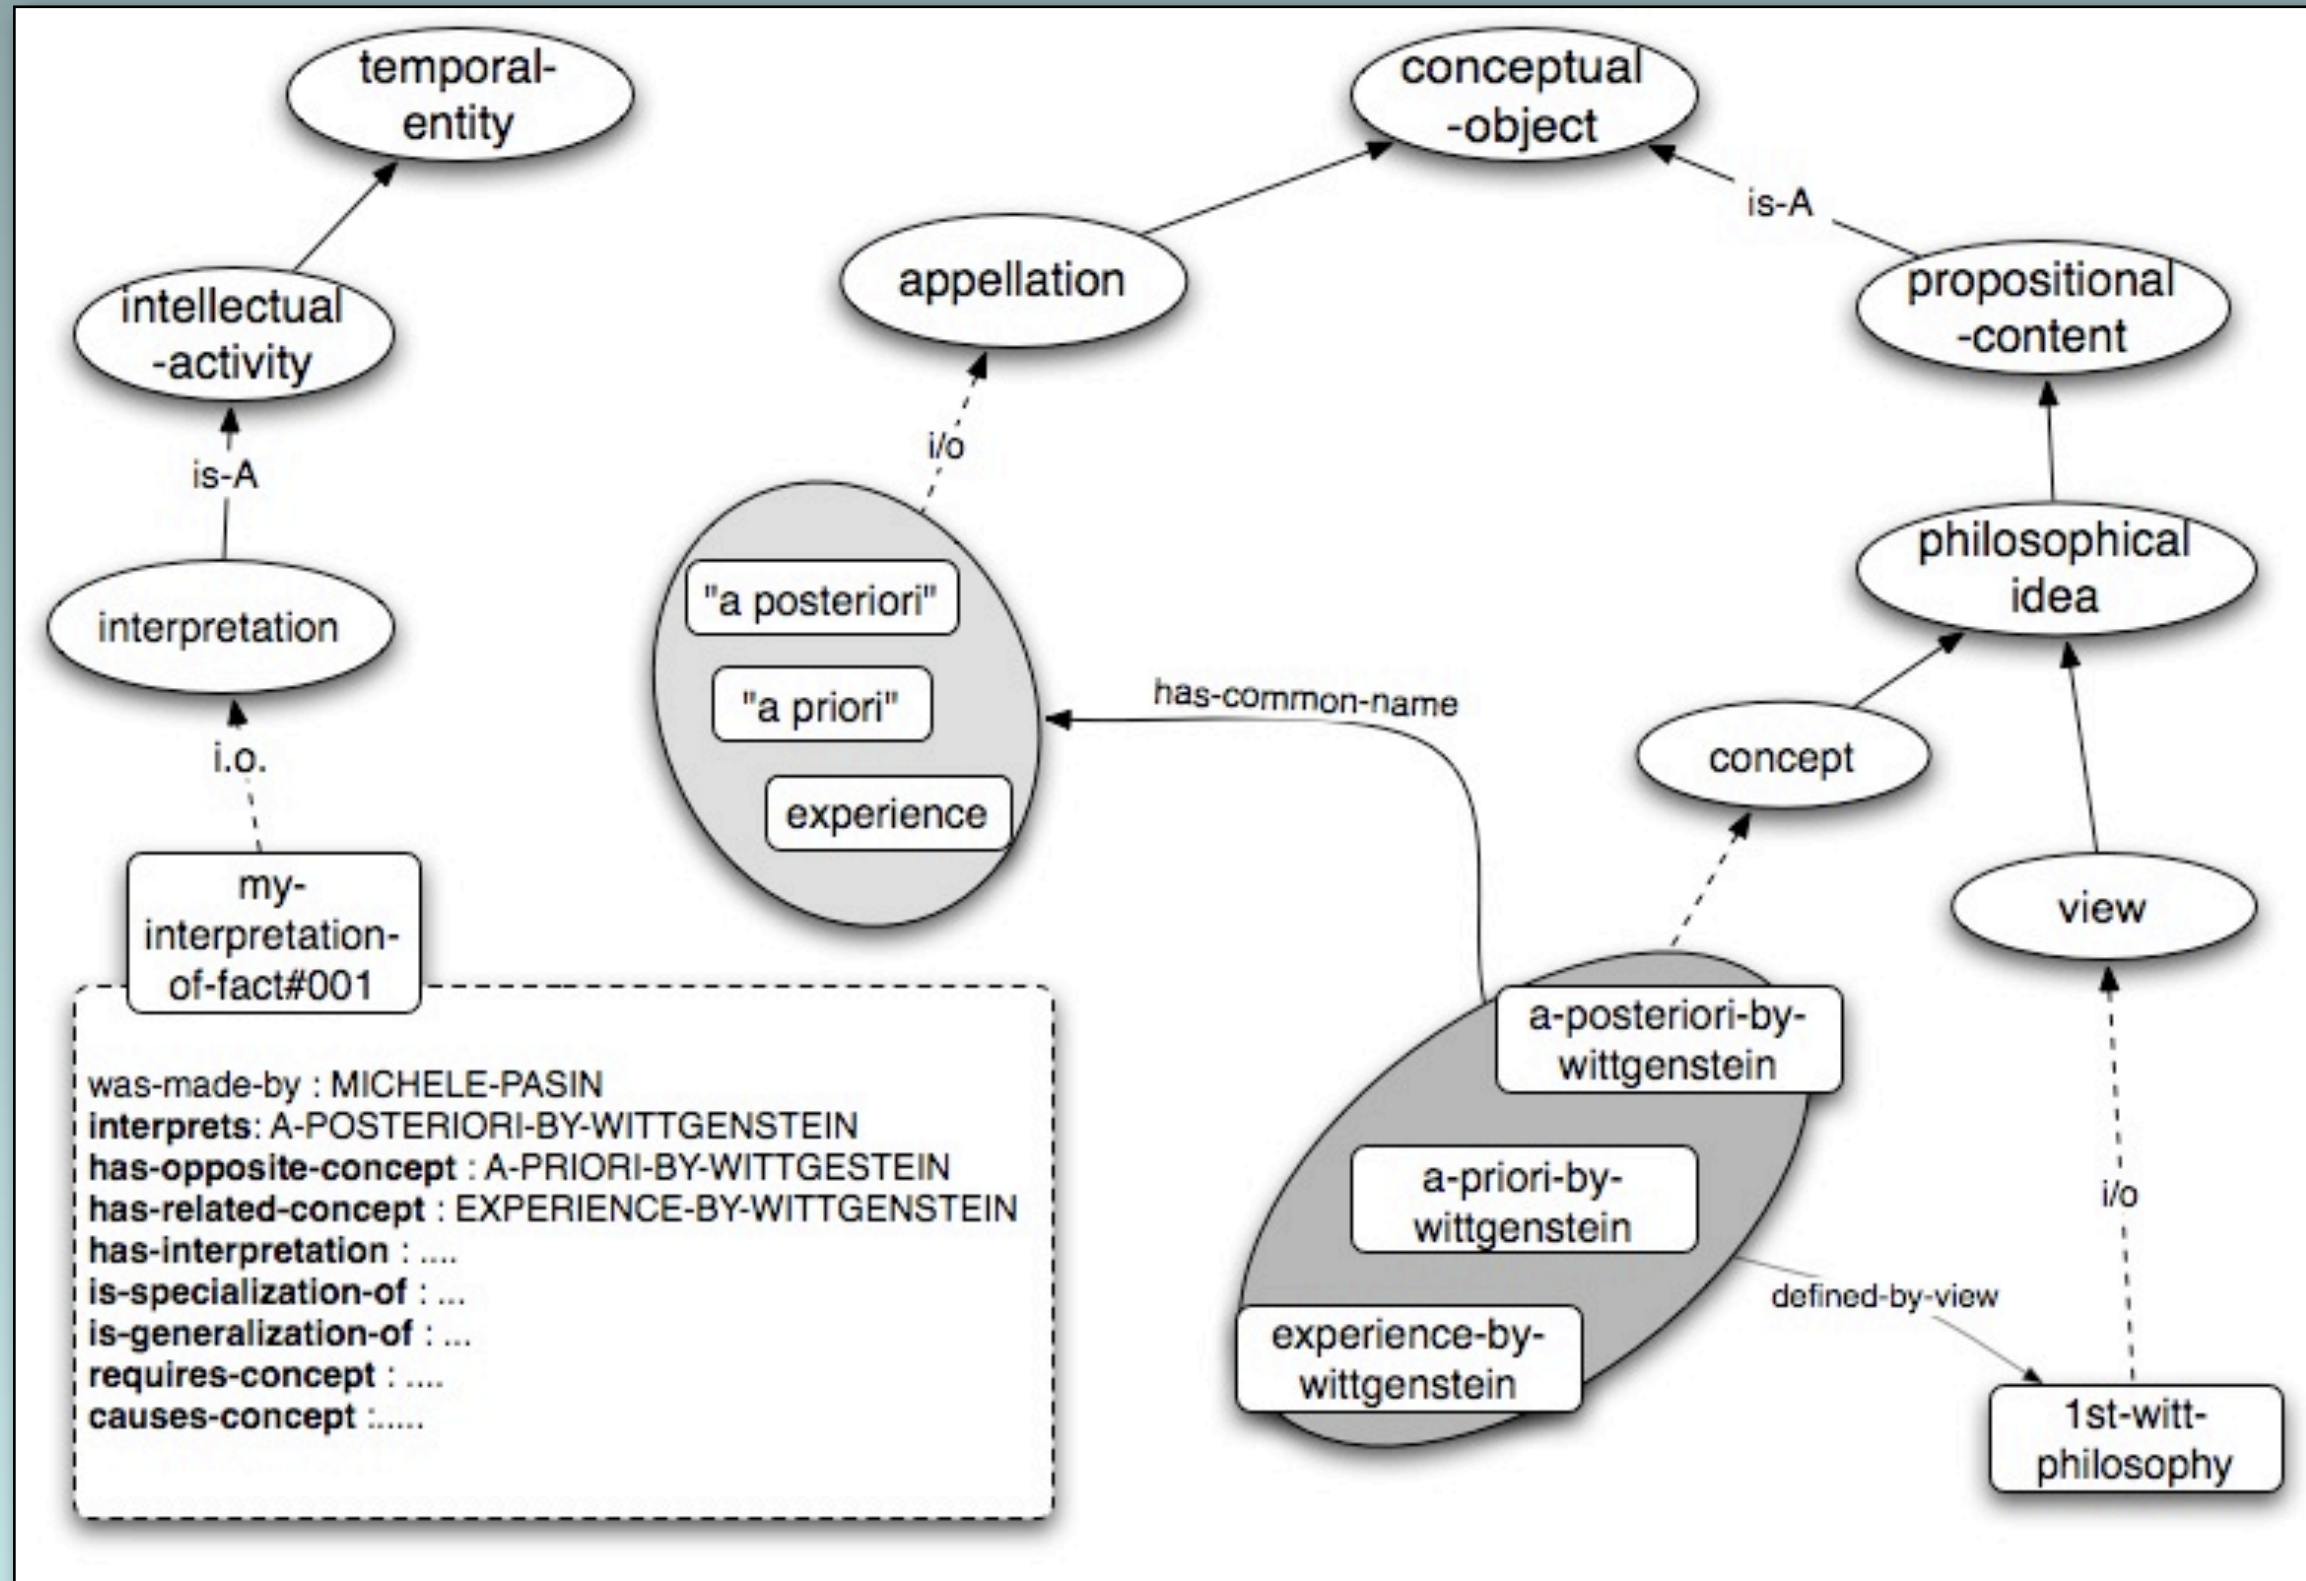

...“stone” can be a concept, if
there’s a view defining it!

- **Goal:** individuate the types
of non-physical objs which
play a role in the construction
of viewpoints!

Example: a philosophical event

Important: interpretations vs ideas

Ex. I: how many senses of rationalism?

“Descartes was one of the founders of modern rationalism”
“Throughout history, the attacks of rationalism against empiricism has diminished”

“Throughout history, the attacks of rationalism against empiricism has diminished”

The diagram illustrates the relationships between three main categories: Actor, View, and Period, each represented by a large oval containing several sub-entities.

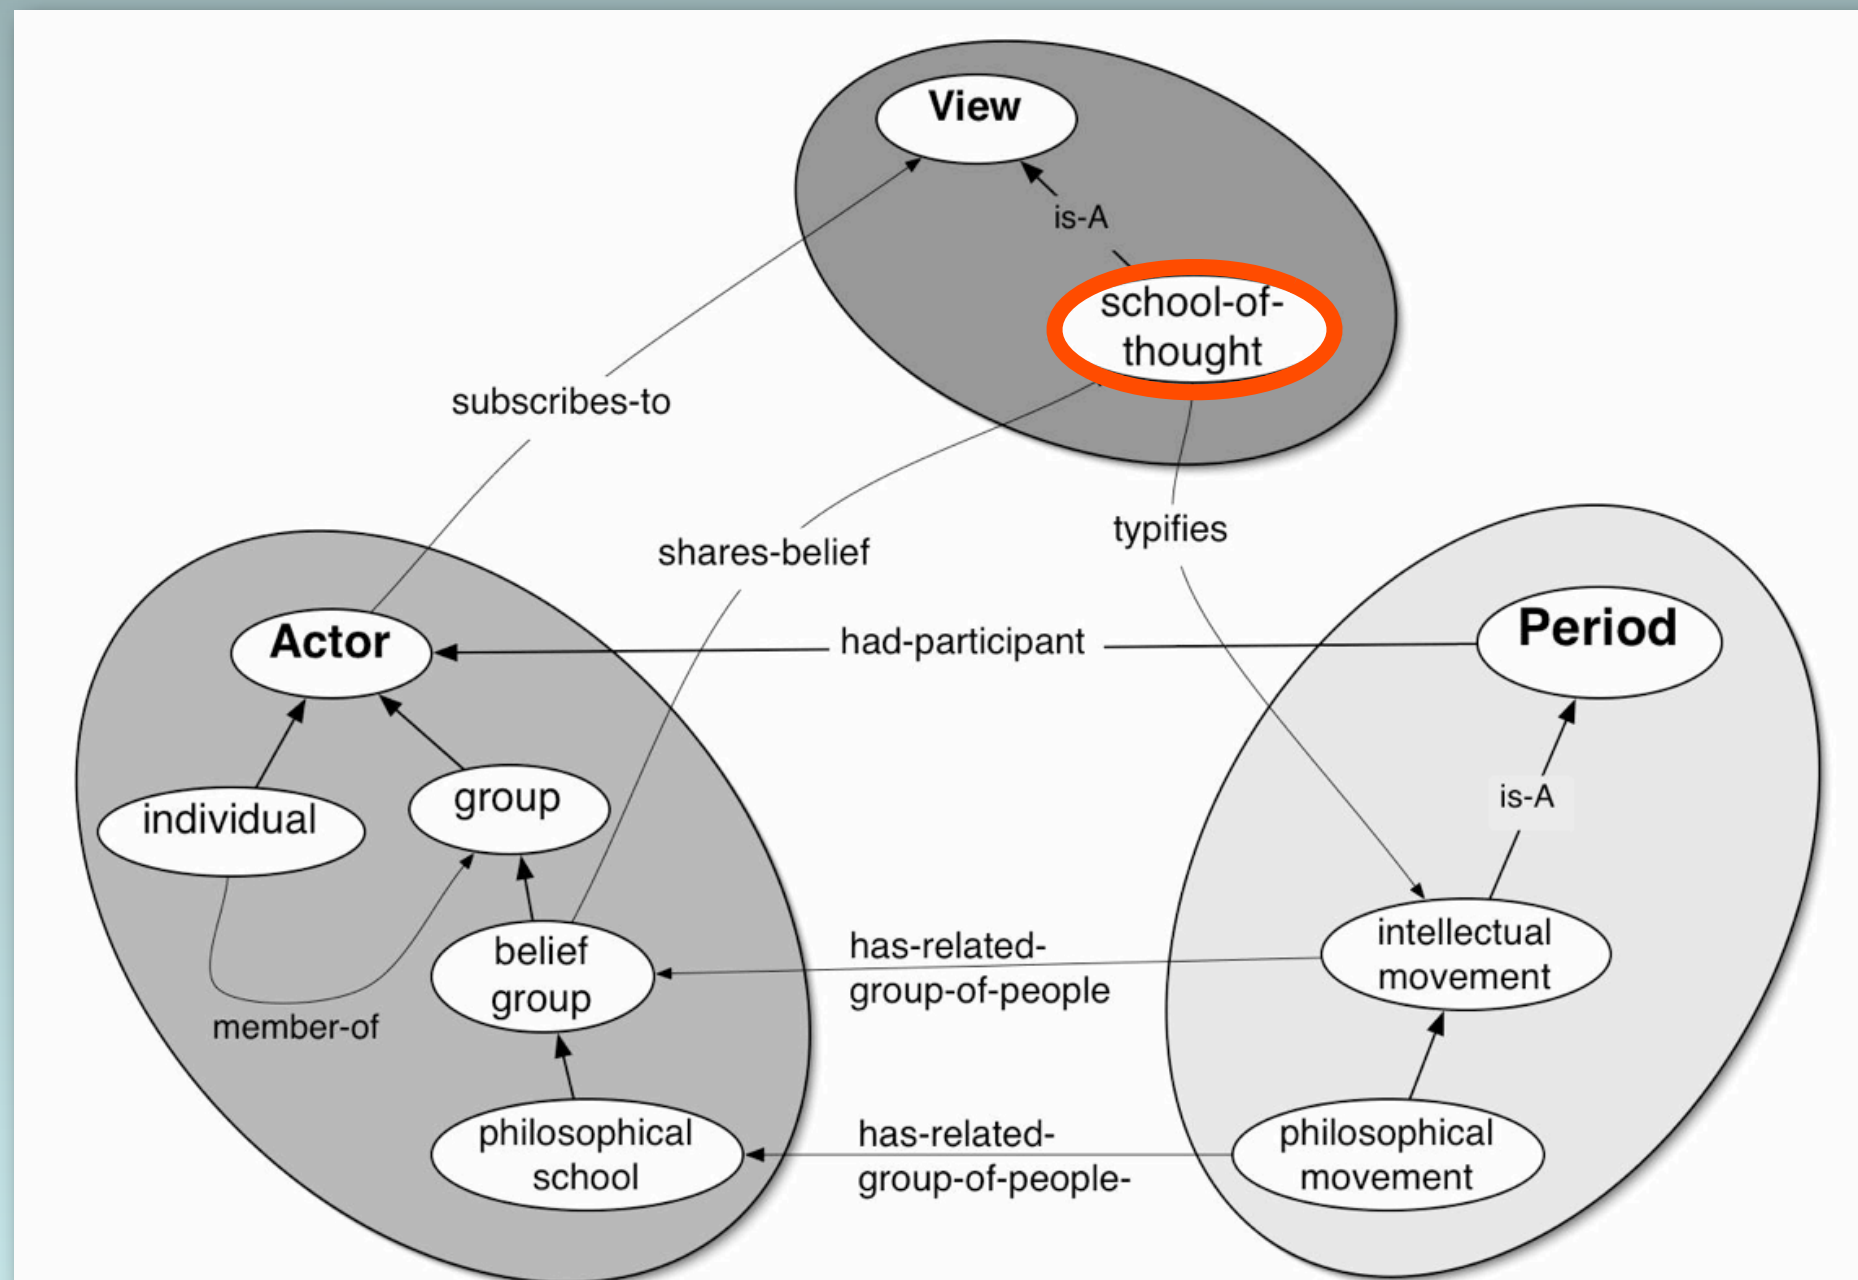

- Actor Category (Dark Grey Oval):**
 - individual** (oval) → **Actor** (oval)
 - group** (oval) → **Actor** (oval)
 - belief group** (oval) → **group** (oval)
 - philosophical school** (oval) → **belief group** (oval)
 - member-of** (relationship): A curved arrow from **individual** to **group**.
- View Category (Dark Grey Oval):**
 - school-of-thought** (oval) → **View** (oval)
 - is-A** (relationship): An arrow from **school-of-thought** to **View**.
- Period Category (Light Grey Oval):**
 - intellectual movement** (oval) → **Period** (oval)
 - philosophical movement** (oval) → **intellectual movement** (oval)
 - is-A** (relationship): An arrow from **philosophical movement** to **intellectual movement**.
- Inter-category Relationships:**
 - subscribes-to**: An arrow from **Actor** to **View**.
 - shares-belief**: An arrow from **Actor** to **school-of-thought**.
 - typifies**: An arrow from **school-of-thought** to **intellectual movement**.
 - had-participant**: An arrow from **Period** to **Actor**.
 - has-related-group-of-people** (two instances):
 - From **intellectual movement** to **belief group**.
 - From **philosophical movement** to **philosophical school**.

Ex. I: how many senses of rationalism?

*“This theory is clearly a new and re-shaped **rationalism**”*

“Descartes was one of the founders of modern rationalism”

“Throughout history, the attacks of rationalism against empiricism has diminished”

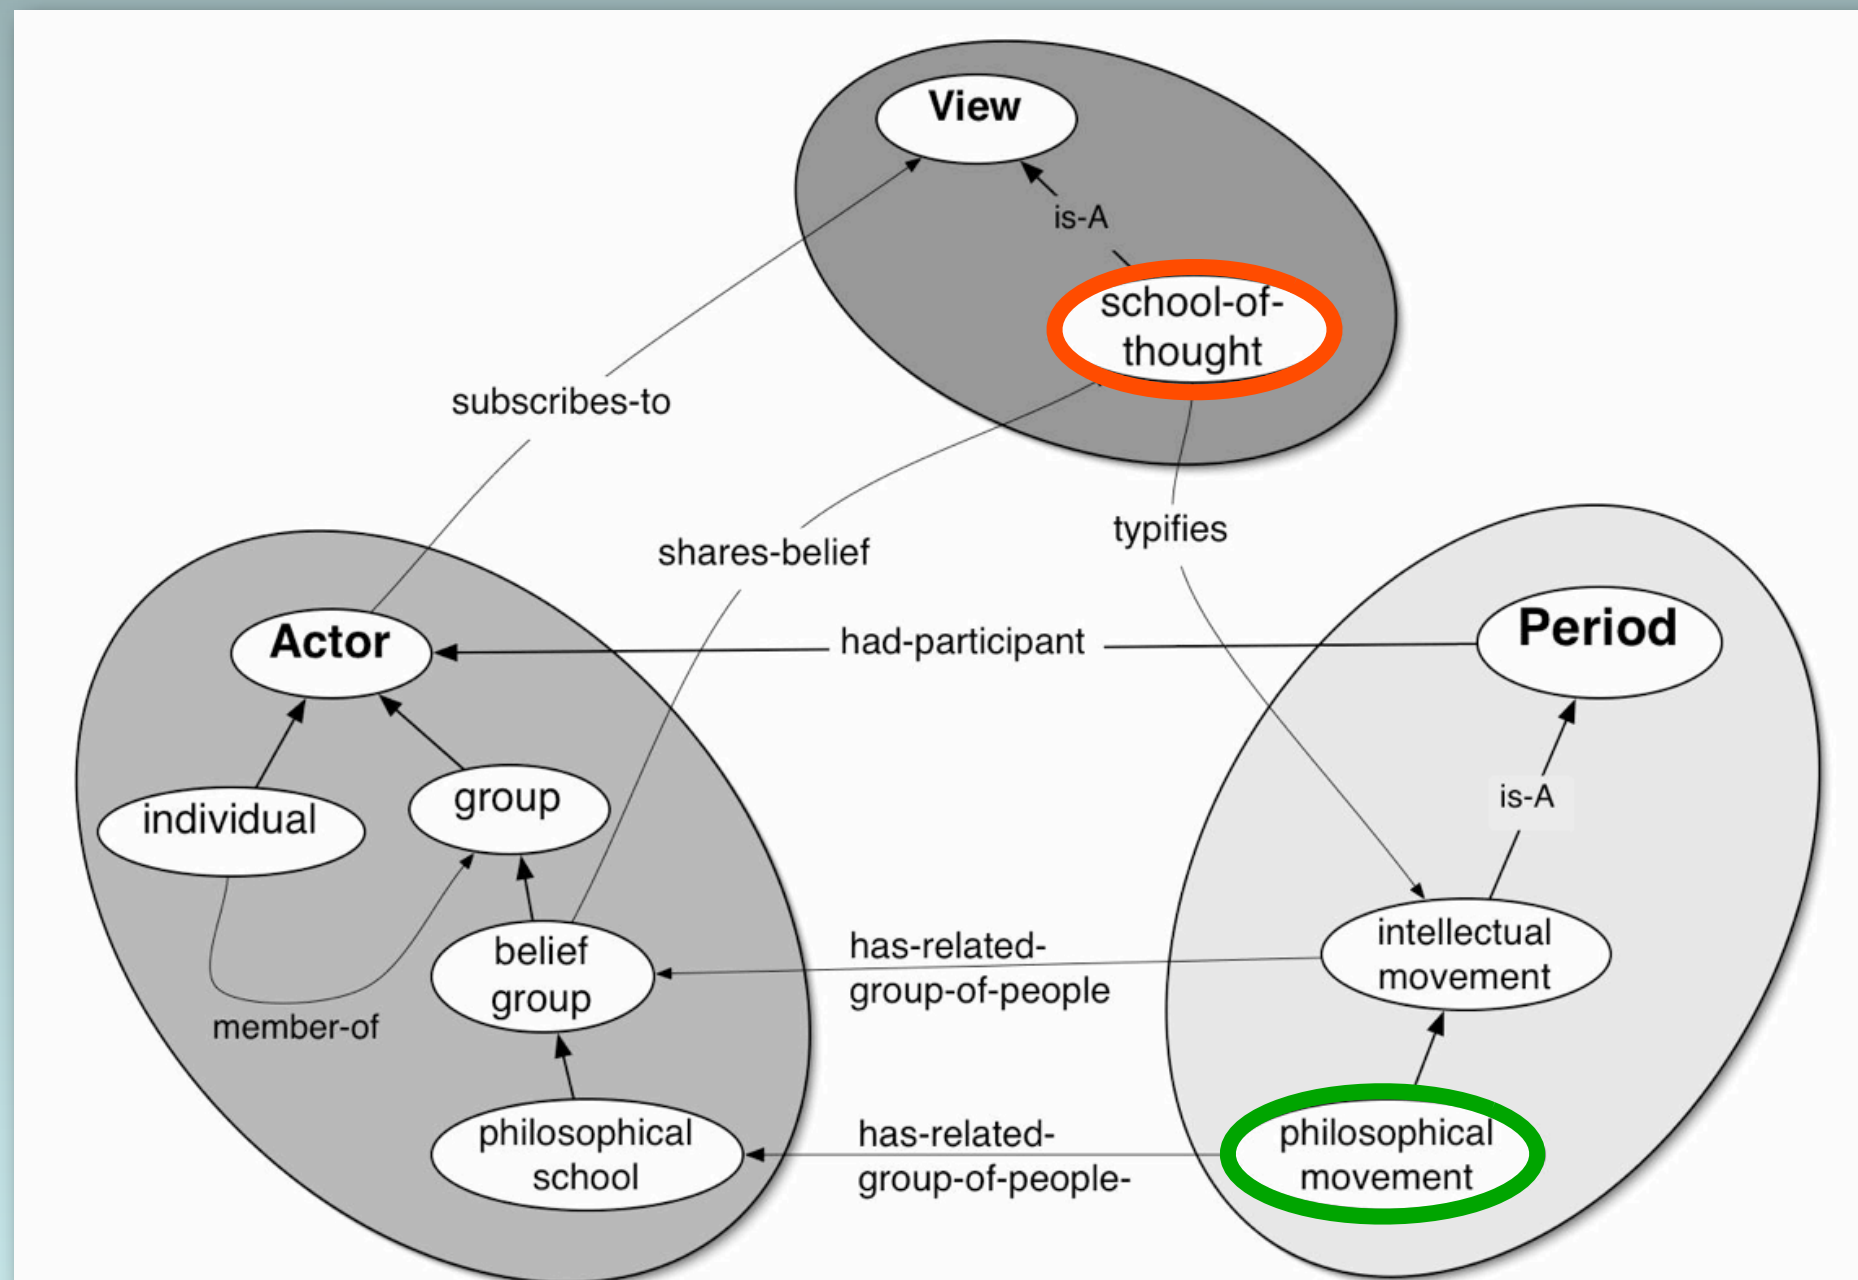

Ex. I: how many senses of rationalism?

*“This theory is clearly a new and re-shaped **rationalism**”*

*“Descartes was one of the founders of modern **rationalism**”*

“Throughout history, the attacks of rationalism against empiricism has diminished”

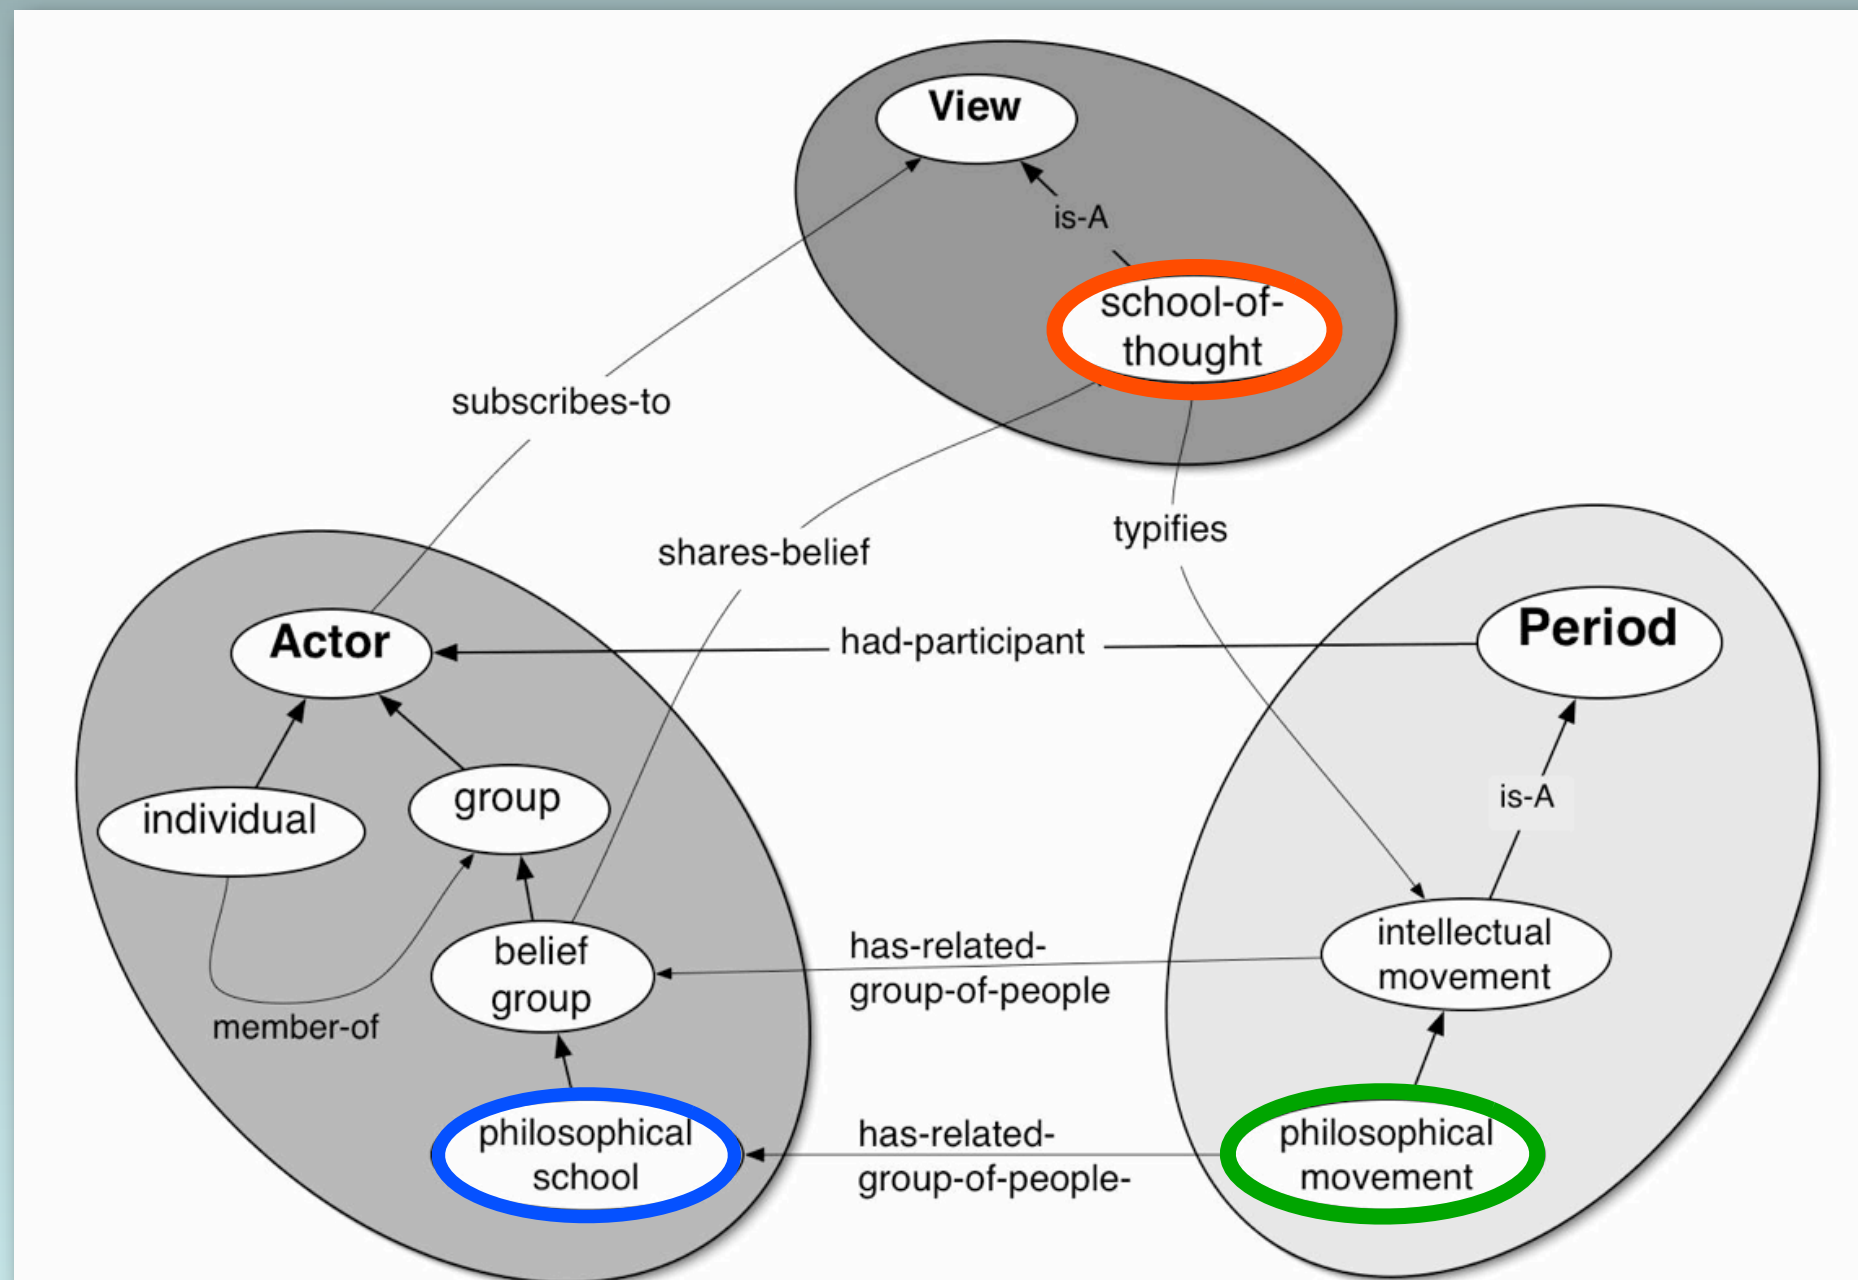

Ex. I: how many senses of rationalism?

*“This theory is clearly a new and re-shaped **rationalism**”*

*“Descartes was one of the founders of modern **rationalism**”*

*“Throughout history, the attacks of **rationalism** against empiricism has diminished”*

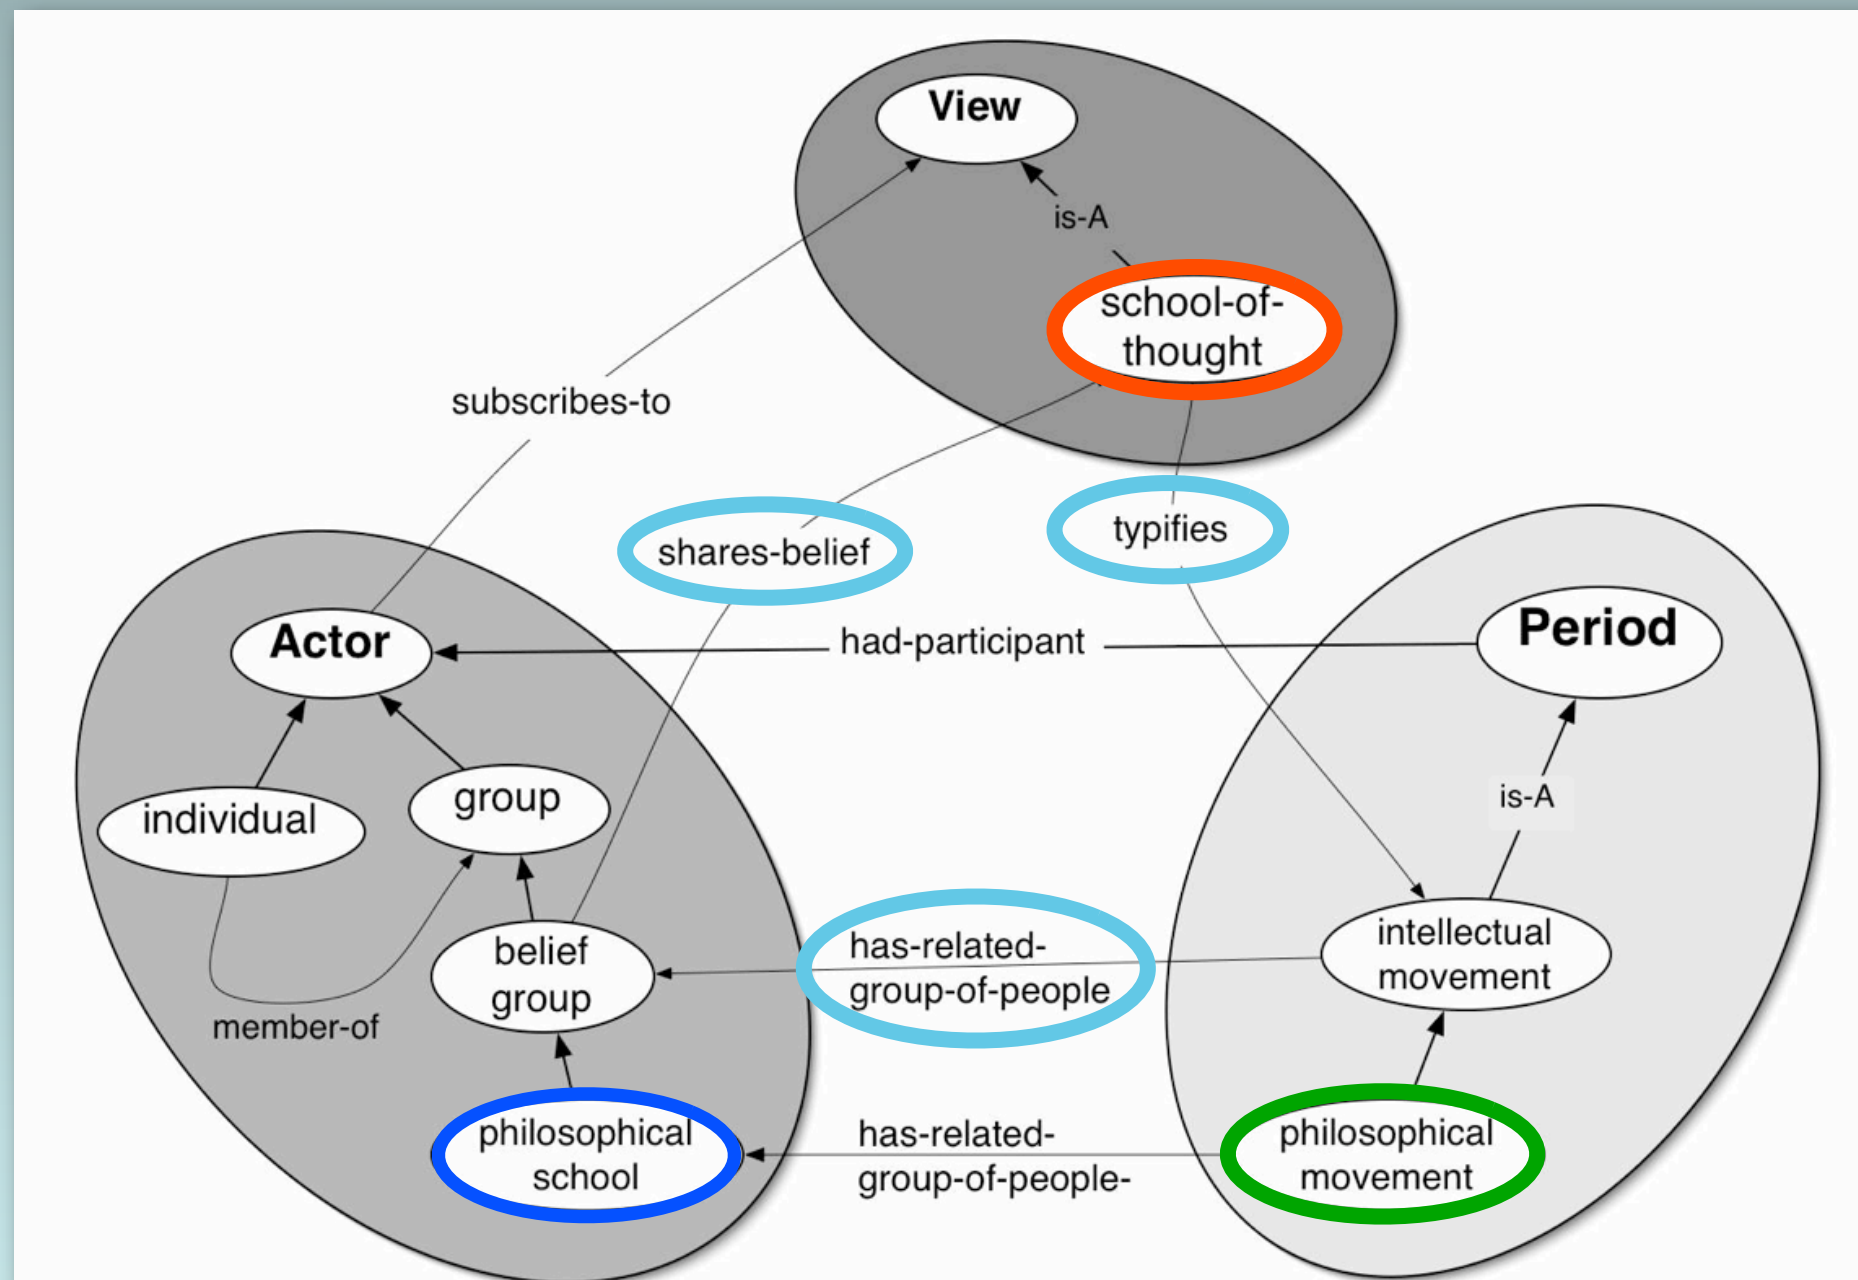

Ex. I: how many senses of rationalism?

*“This theory is clearly a new and re-shaped **rationalism**”*

*“Descartes was one of the founders of modern **rationalism**”*

*“Throughout history, the attacks of **rationalism** against empiricism has diminished”*

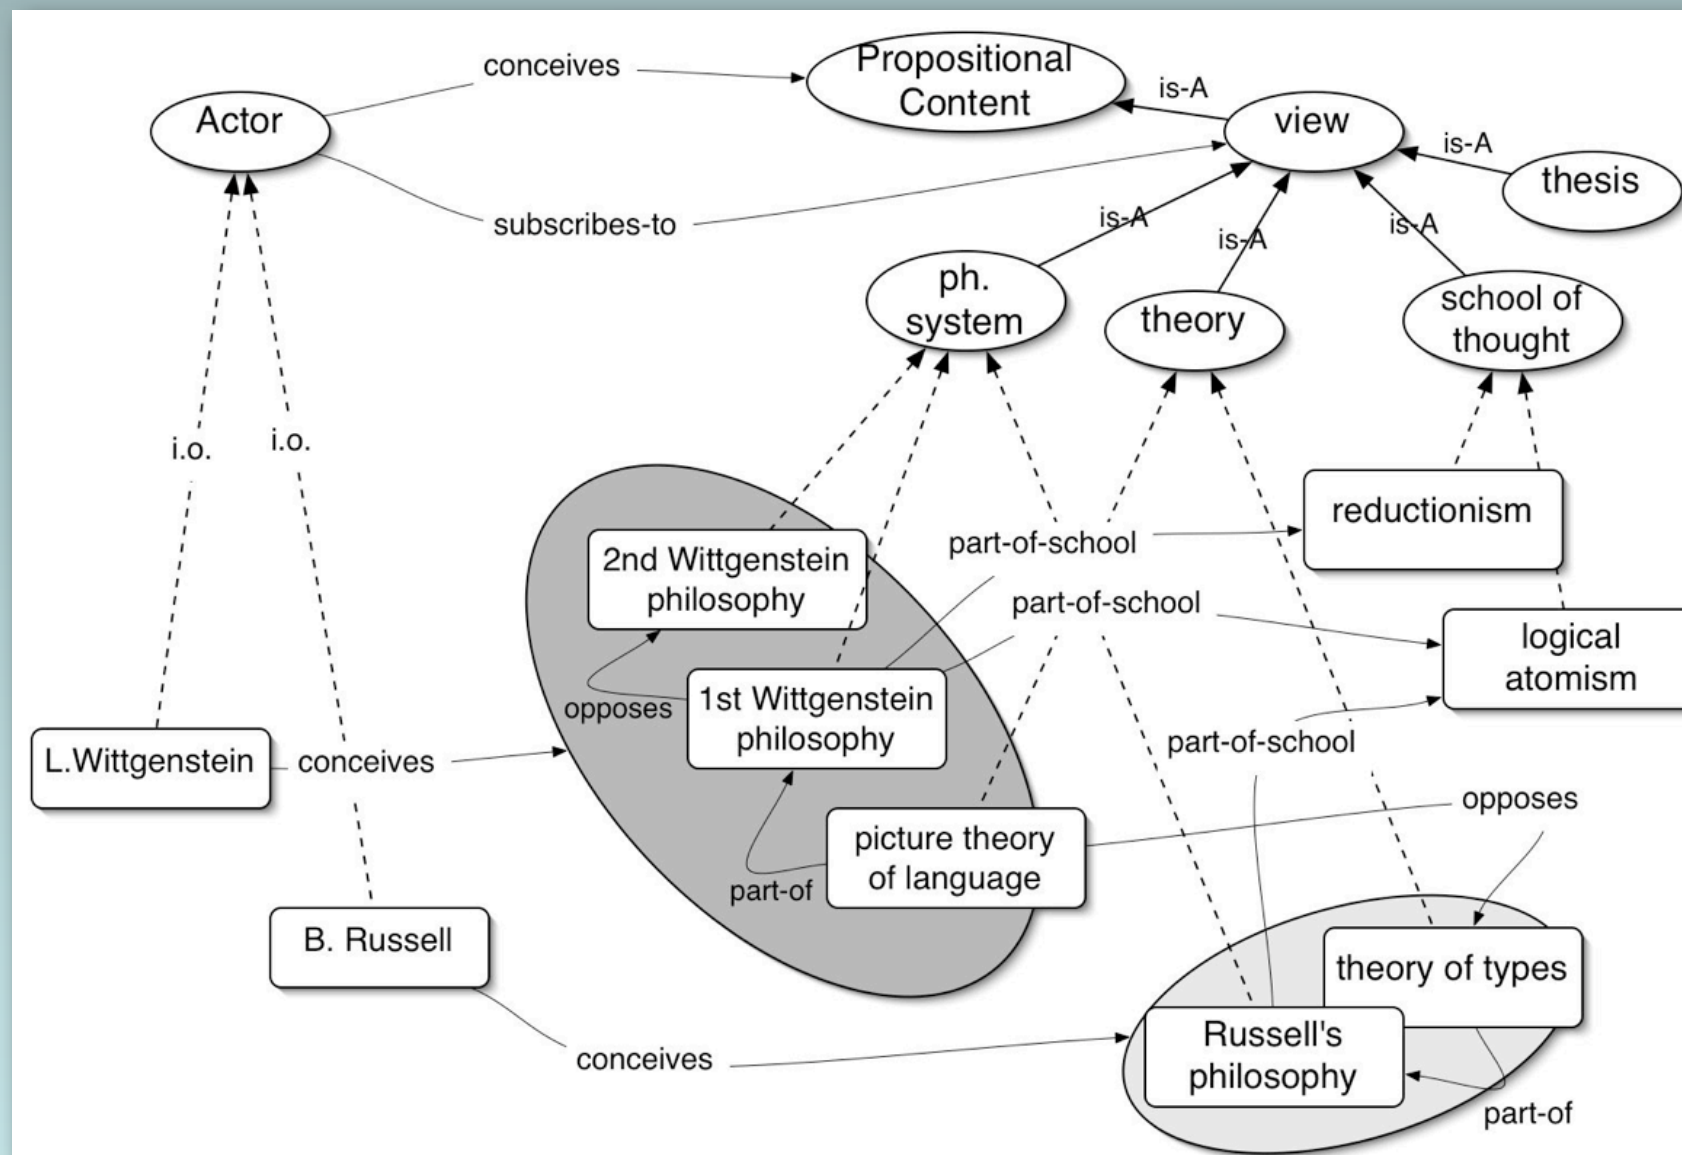

Ex. II: not all views are theories!

“Wittgenstein’s philosophy, differently from Frege’s one, deals also with problems typical of aesthetics”

“The 2nd Wittgenstein philosophy is much inspired from a kantianism, than from a logical positivism”

“Within the pictorial theory of language, Wittgenstein demonstrated that we can derive complex sentences from atomic ones”

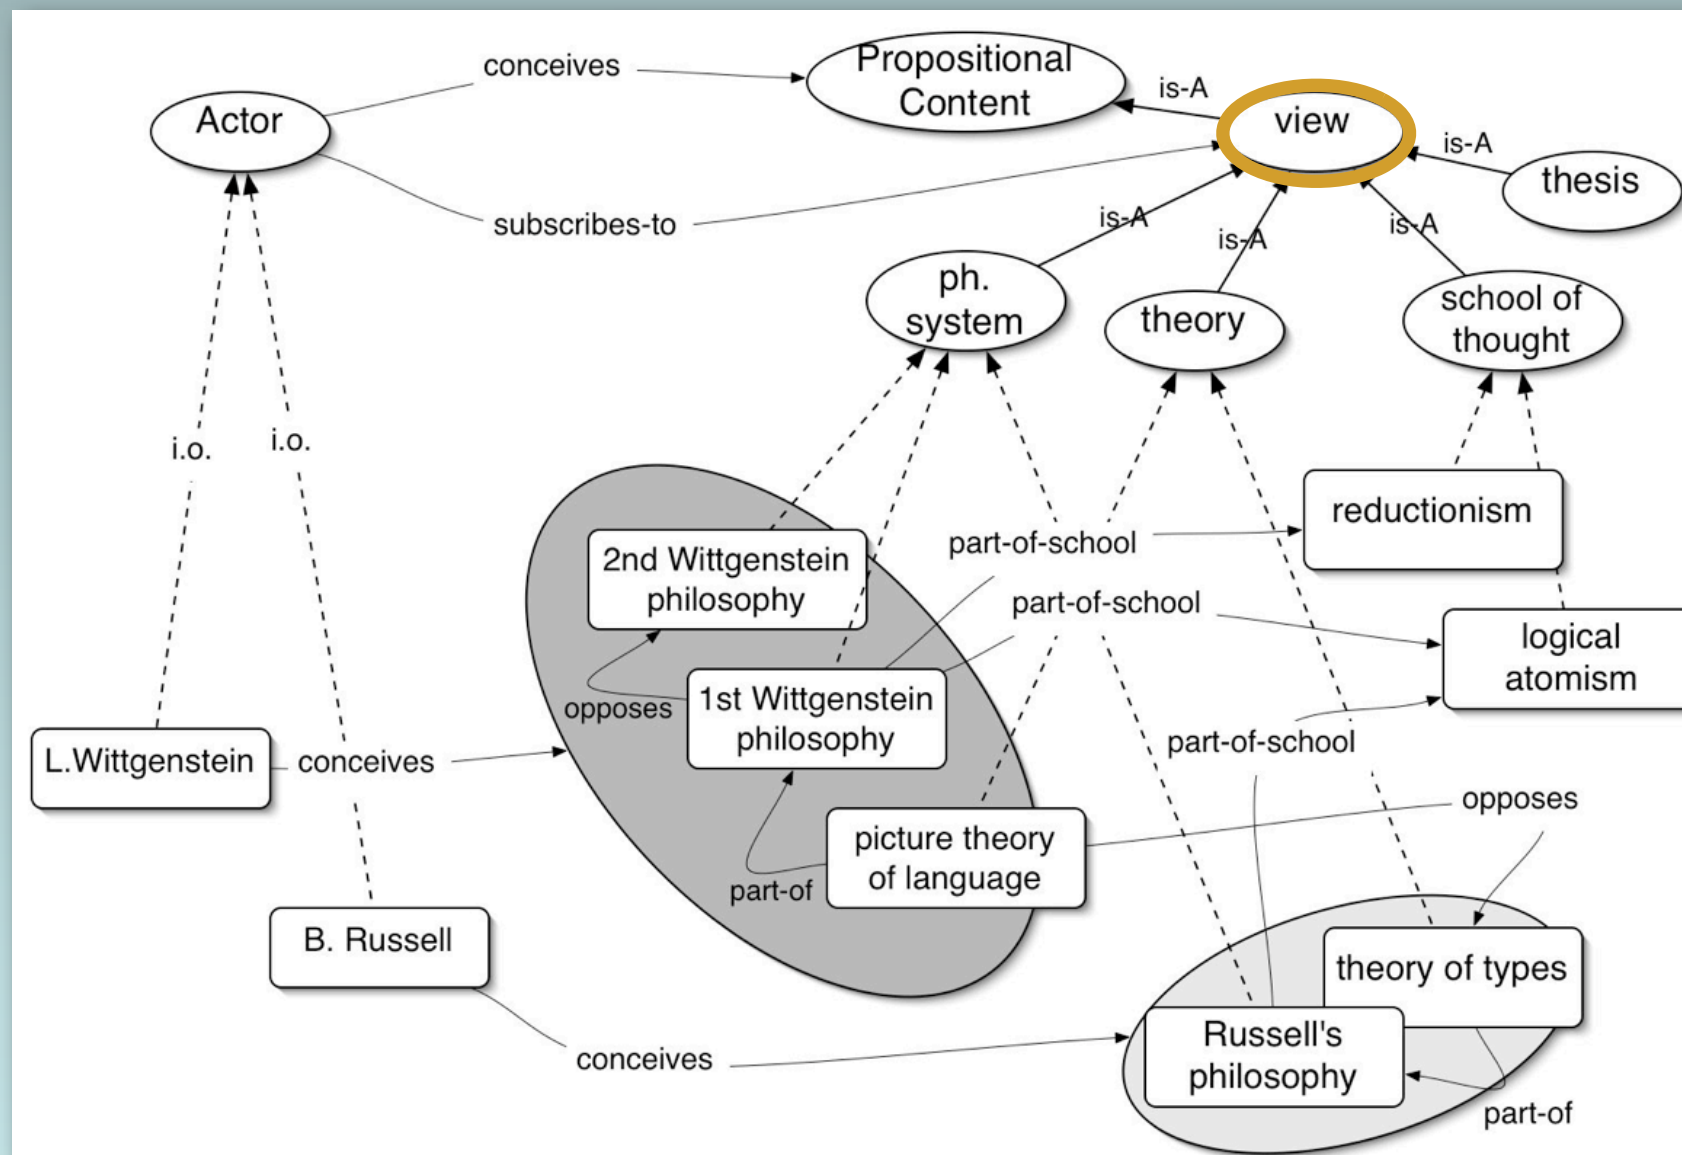

Ex II: not all views are theories!

“*Wittgenstein’s philosophy*, differently from *Frege’s one*, deals also with problems typical of aesthetics”

“The *2nd Wittgenstein philosophy* is much inspired from a *kantianism*, than from a *logical positivism*”

“Within the *pictorial theory of language*, Wittgenstein demonstrated that *we can derive complex sentences from atomic ones*”

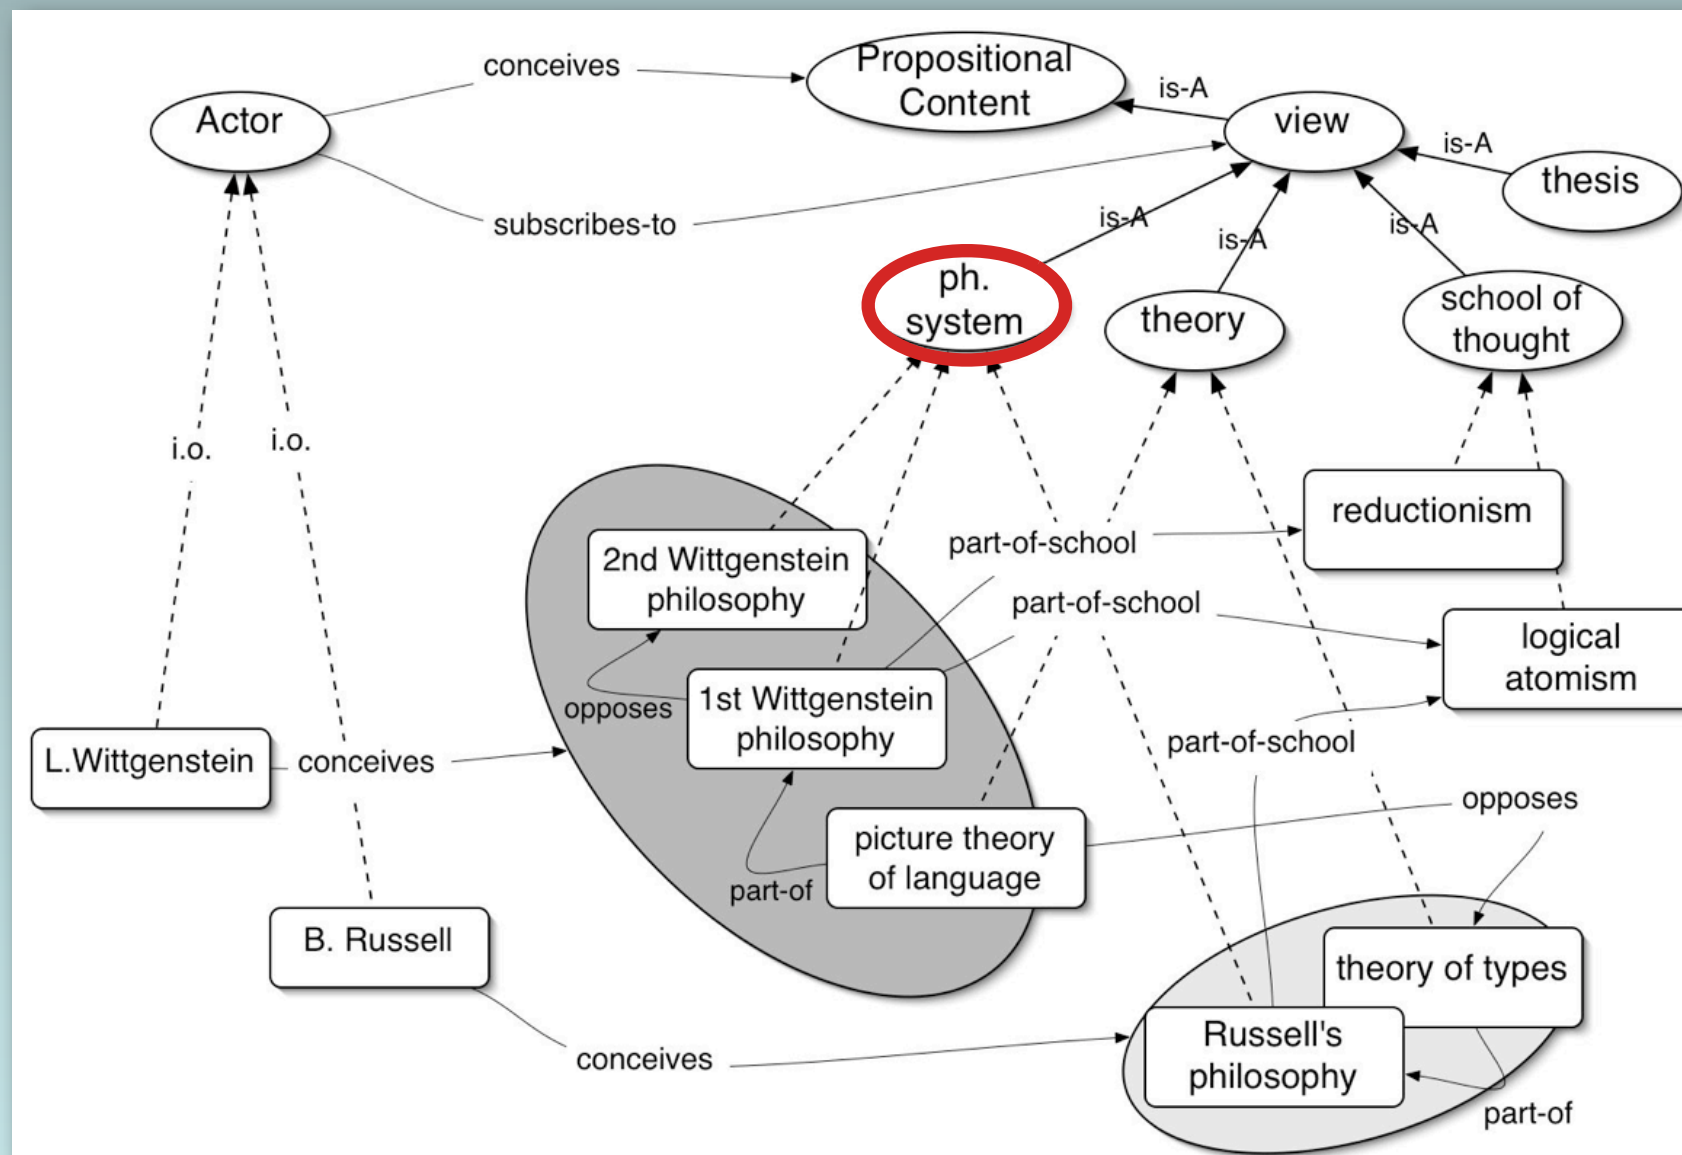

Ex. II: not all views are theories !

“*Wittgenstein’s philosophy*, differently from *Frege’s one*, deals also with problems typical of aesthetics”

“The *2nd Wittgenstein philosophy* is much inspired from a *kantianism*, than from a *logical positivism*”

“Within the *pictorial theory of language*, Wittgenstein demonstrated that *we can derive complex sentences from atomic ones*”

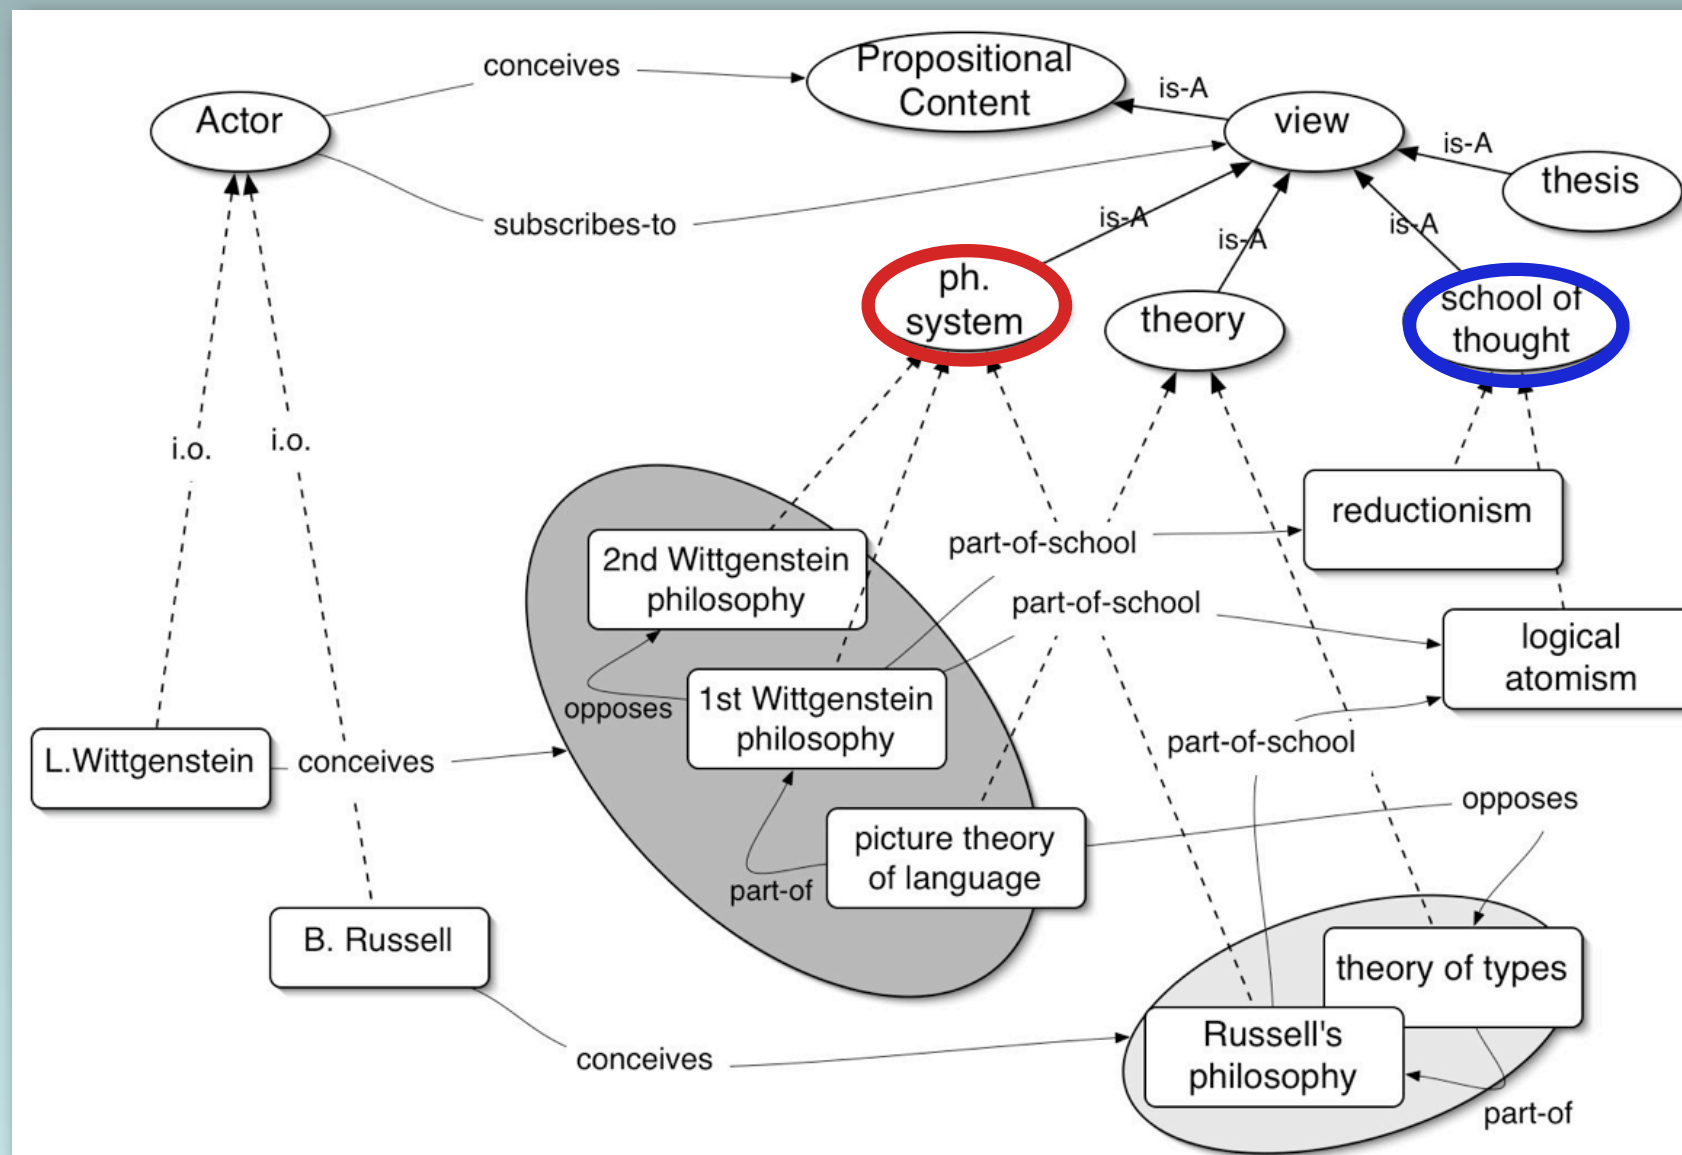

Ex. II: not all views are theories !

“*Wittgenstein’s philosophy*, differently from *Frege’s one*, deals also with problems typical of aesthetics”

“The *2nd Wittgenstein philosophy* is much inspired from a *kantianism*, than from a *logical positivism*”

“Within the *pictorial theory of language*, Wittgenstein demonstrated that *we can derive complex sentences from atomic ones*”

Ex. II: not all views are theories

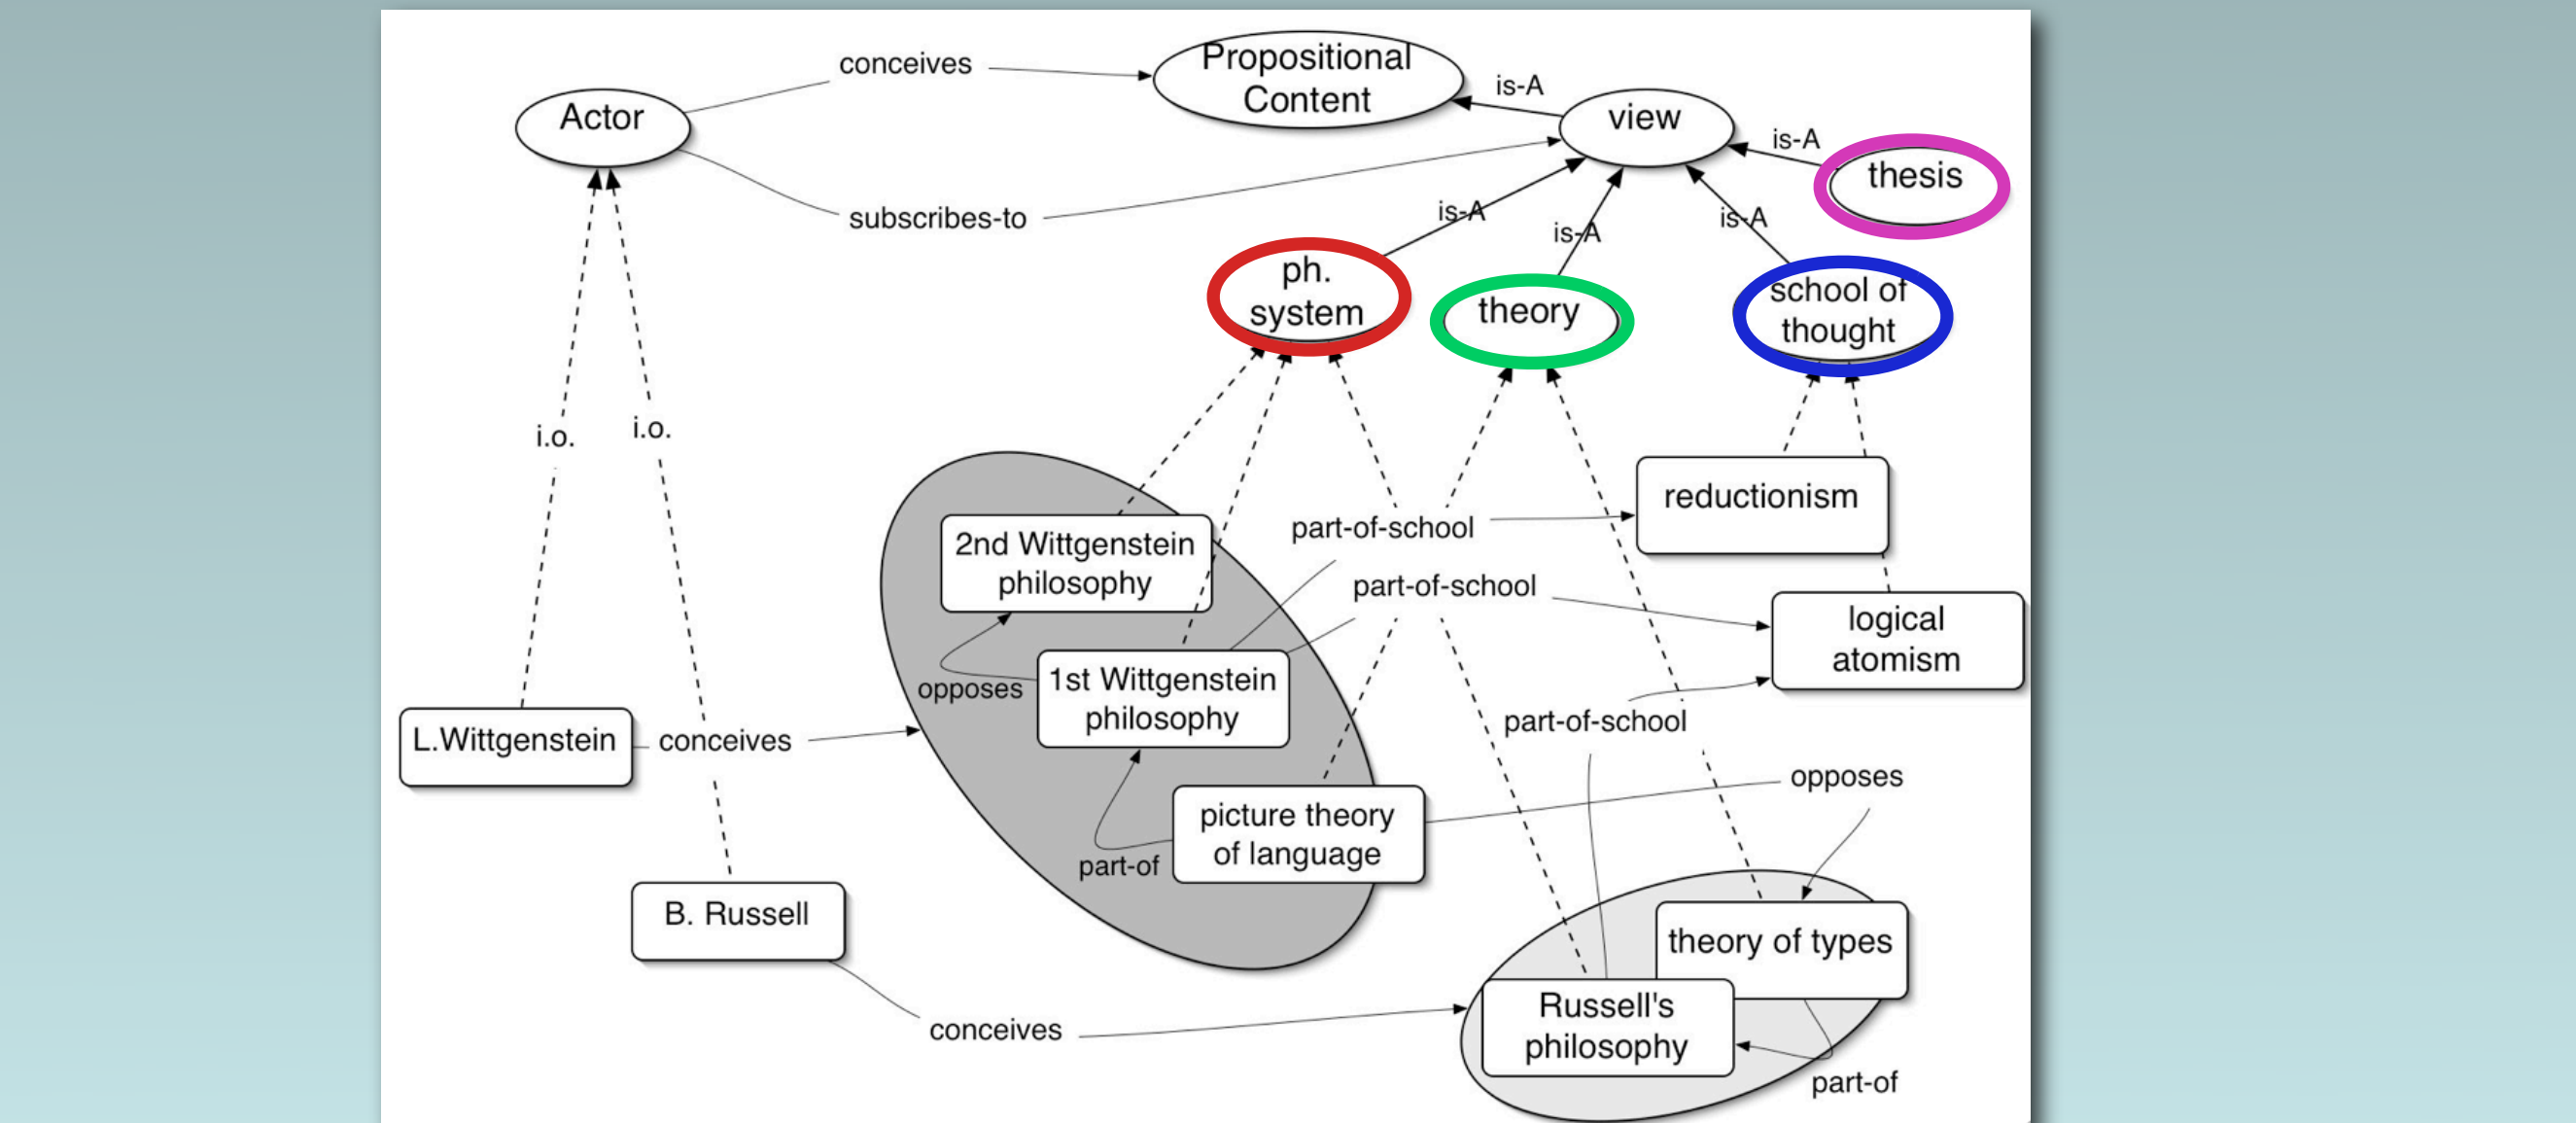

“*Wittgenstein’s philosophy*, differently from *Frege’s one*, deals also with problems typical of aesthetics”
 “The *2nd Wittgenstein philosophy* is much inspired from a *kantianism*, than from a *logical positivism*”
 “Within the *pictorial theory of language*, Wittgenstein demonstrated that *we can derive complex sentences from atomic ones*”

“*Wittgenstein’s philosophy*, differently from *Frege’s one*, deals also with problems typical of aesthetics”
 “The *2nd Wittgenstein philosophy* is much inspired from a *kantianism*, than from a *logical positivism*”
 “Within the *pictorial theory of language*, Wittgenstein demonstrated that *we can derive complex sentences from atomic ones*”

“***Wittgenstein’s philosophy**, differently from **Frege’s one**, deals also with problems typical of aesthetics*”

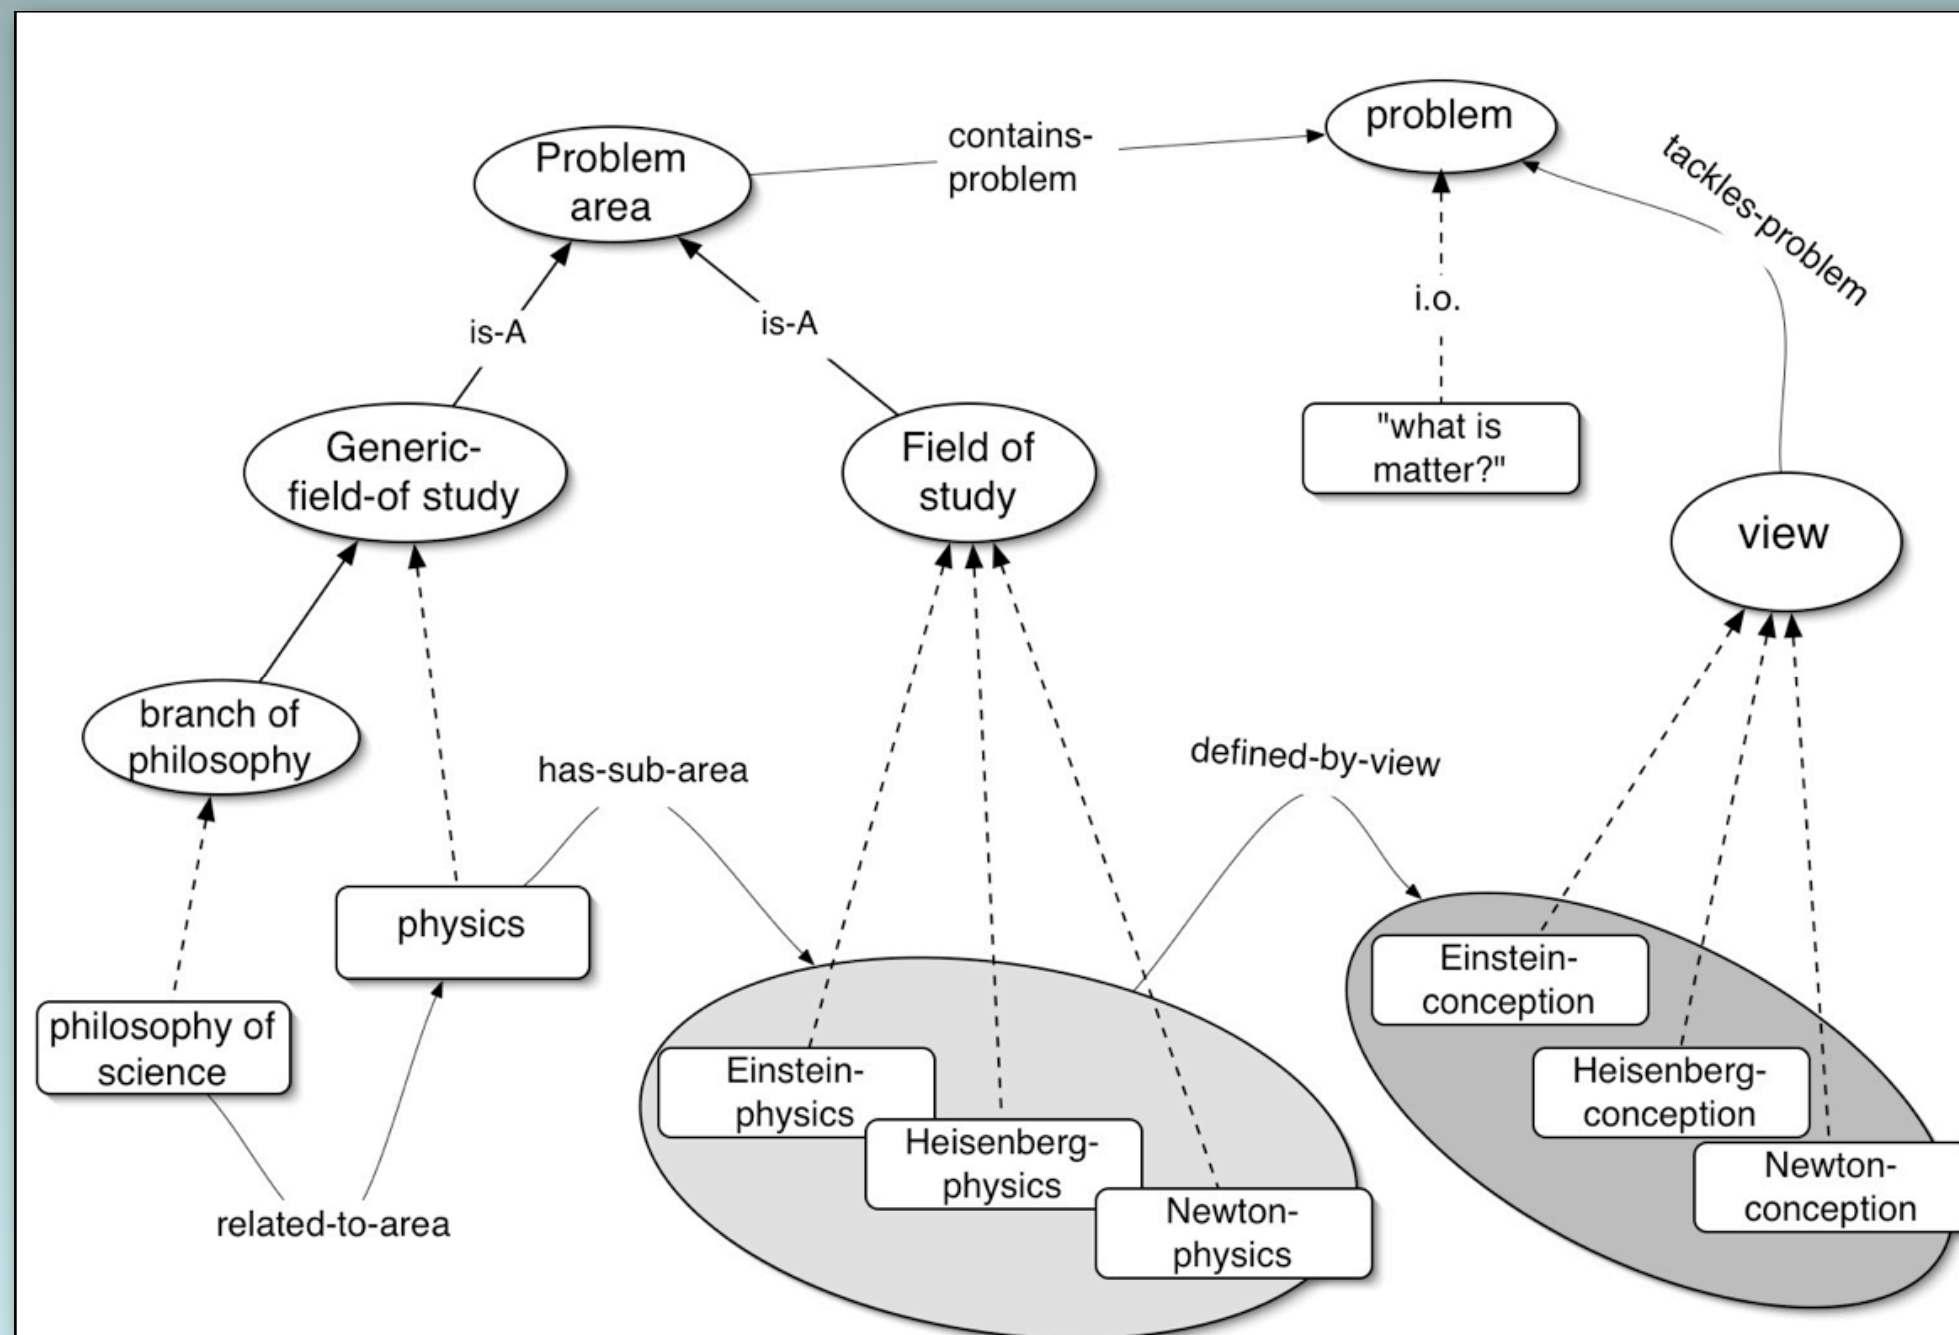

“*The **2nd Wittgenstein philosophy** is much inspired from a **kantianism**, than from a **logical positivism***”

“*Within the **pictorial theory of language**, Wittgenstein demonstrated that **we can derive complex sentences from atomic ones***”

Ex. III: “Problematic” problem-areas..

“Physics deals with problems linked to the definition of the properties of matter, and many others”
*“The problems of newtonian **physics** have just become a particular case of those in einstein **physics**”*
*“Across time, the problems and methods of **physics** have been changing considerably”*

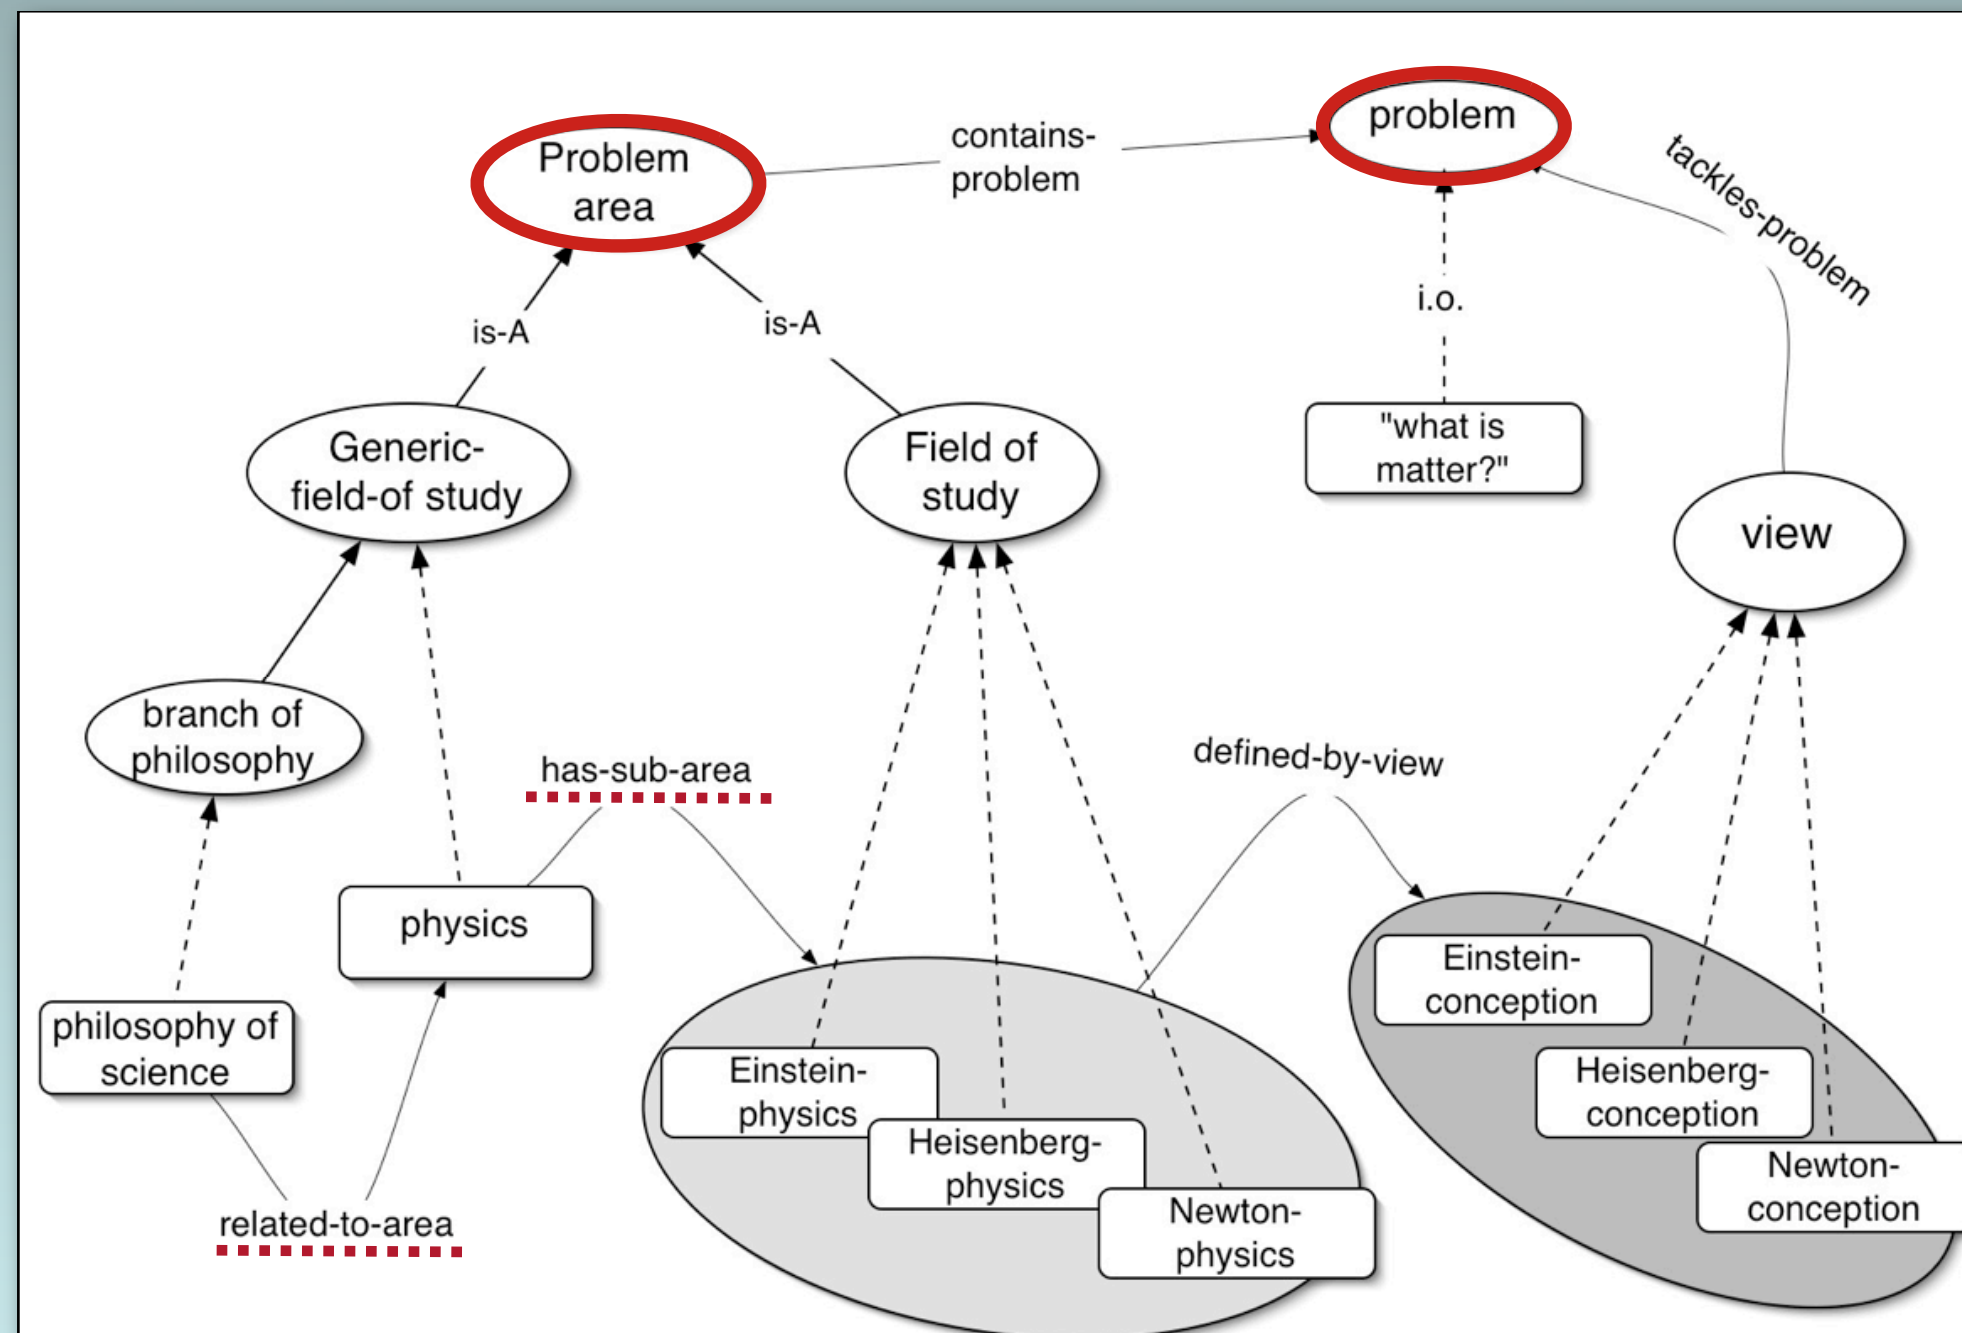

Ex. III: “Problematic” problem-areas..

“Physics deals with problems linked to the definition of the properties of matter, and many others”

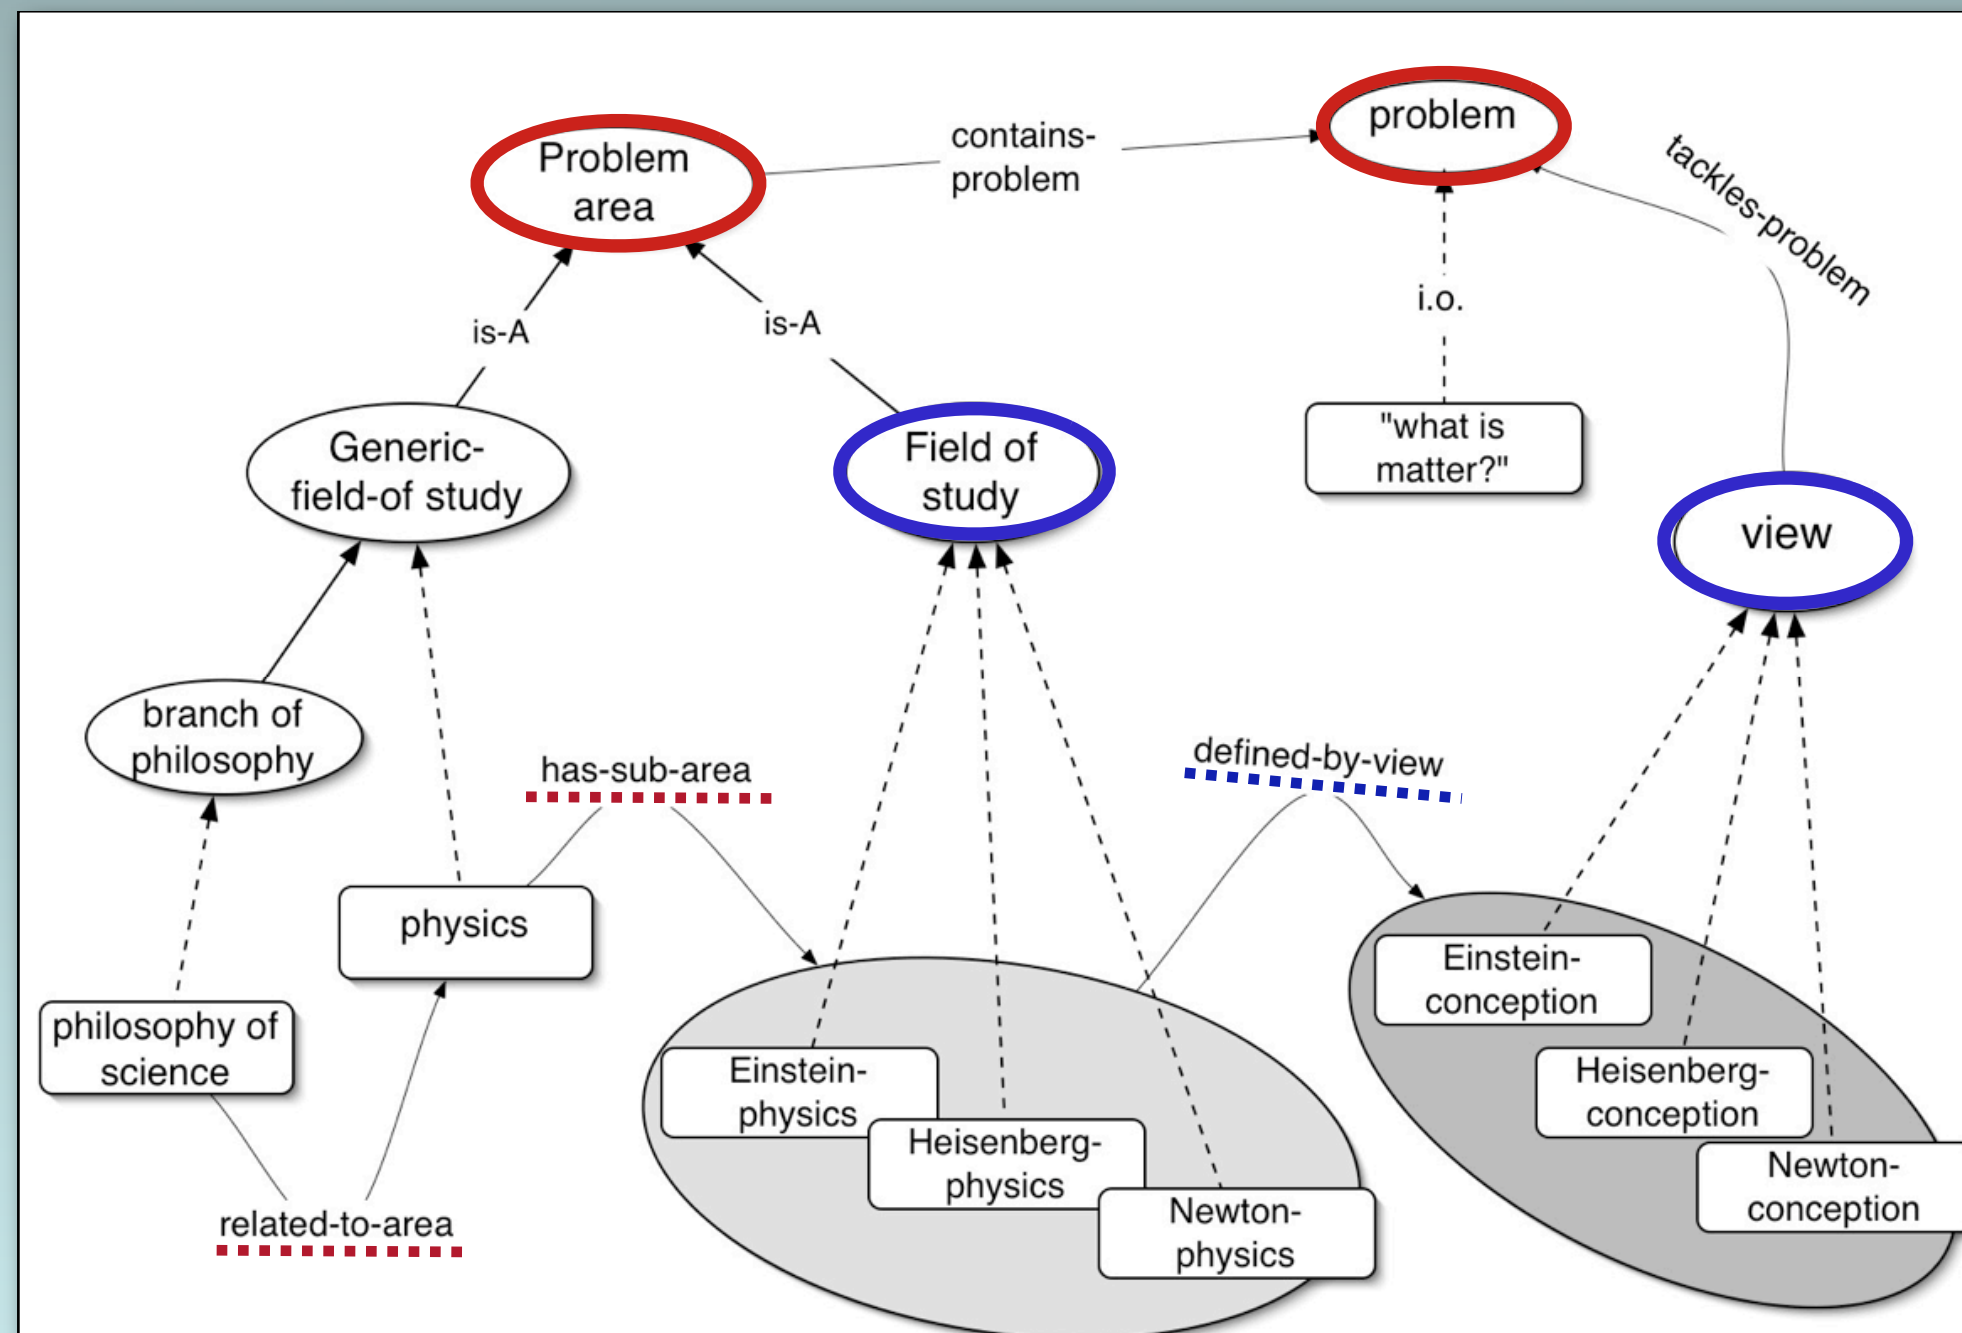

*“The problems of newtonian **physics** have just become a particular case of those in einstein **physics**”*

*“Across time, the problems and methods of **physics** have been changing considerably”*

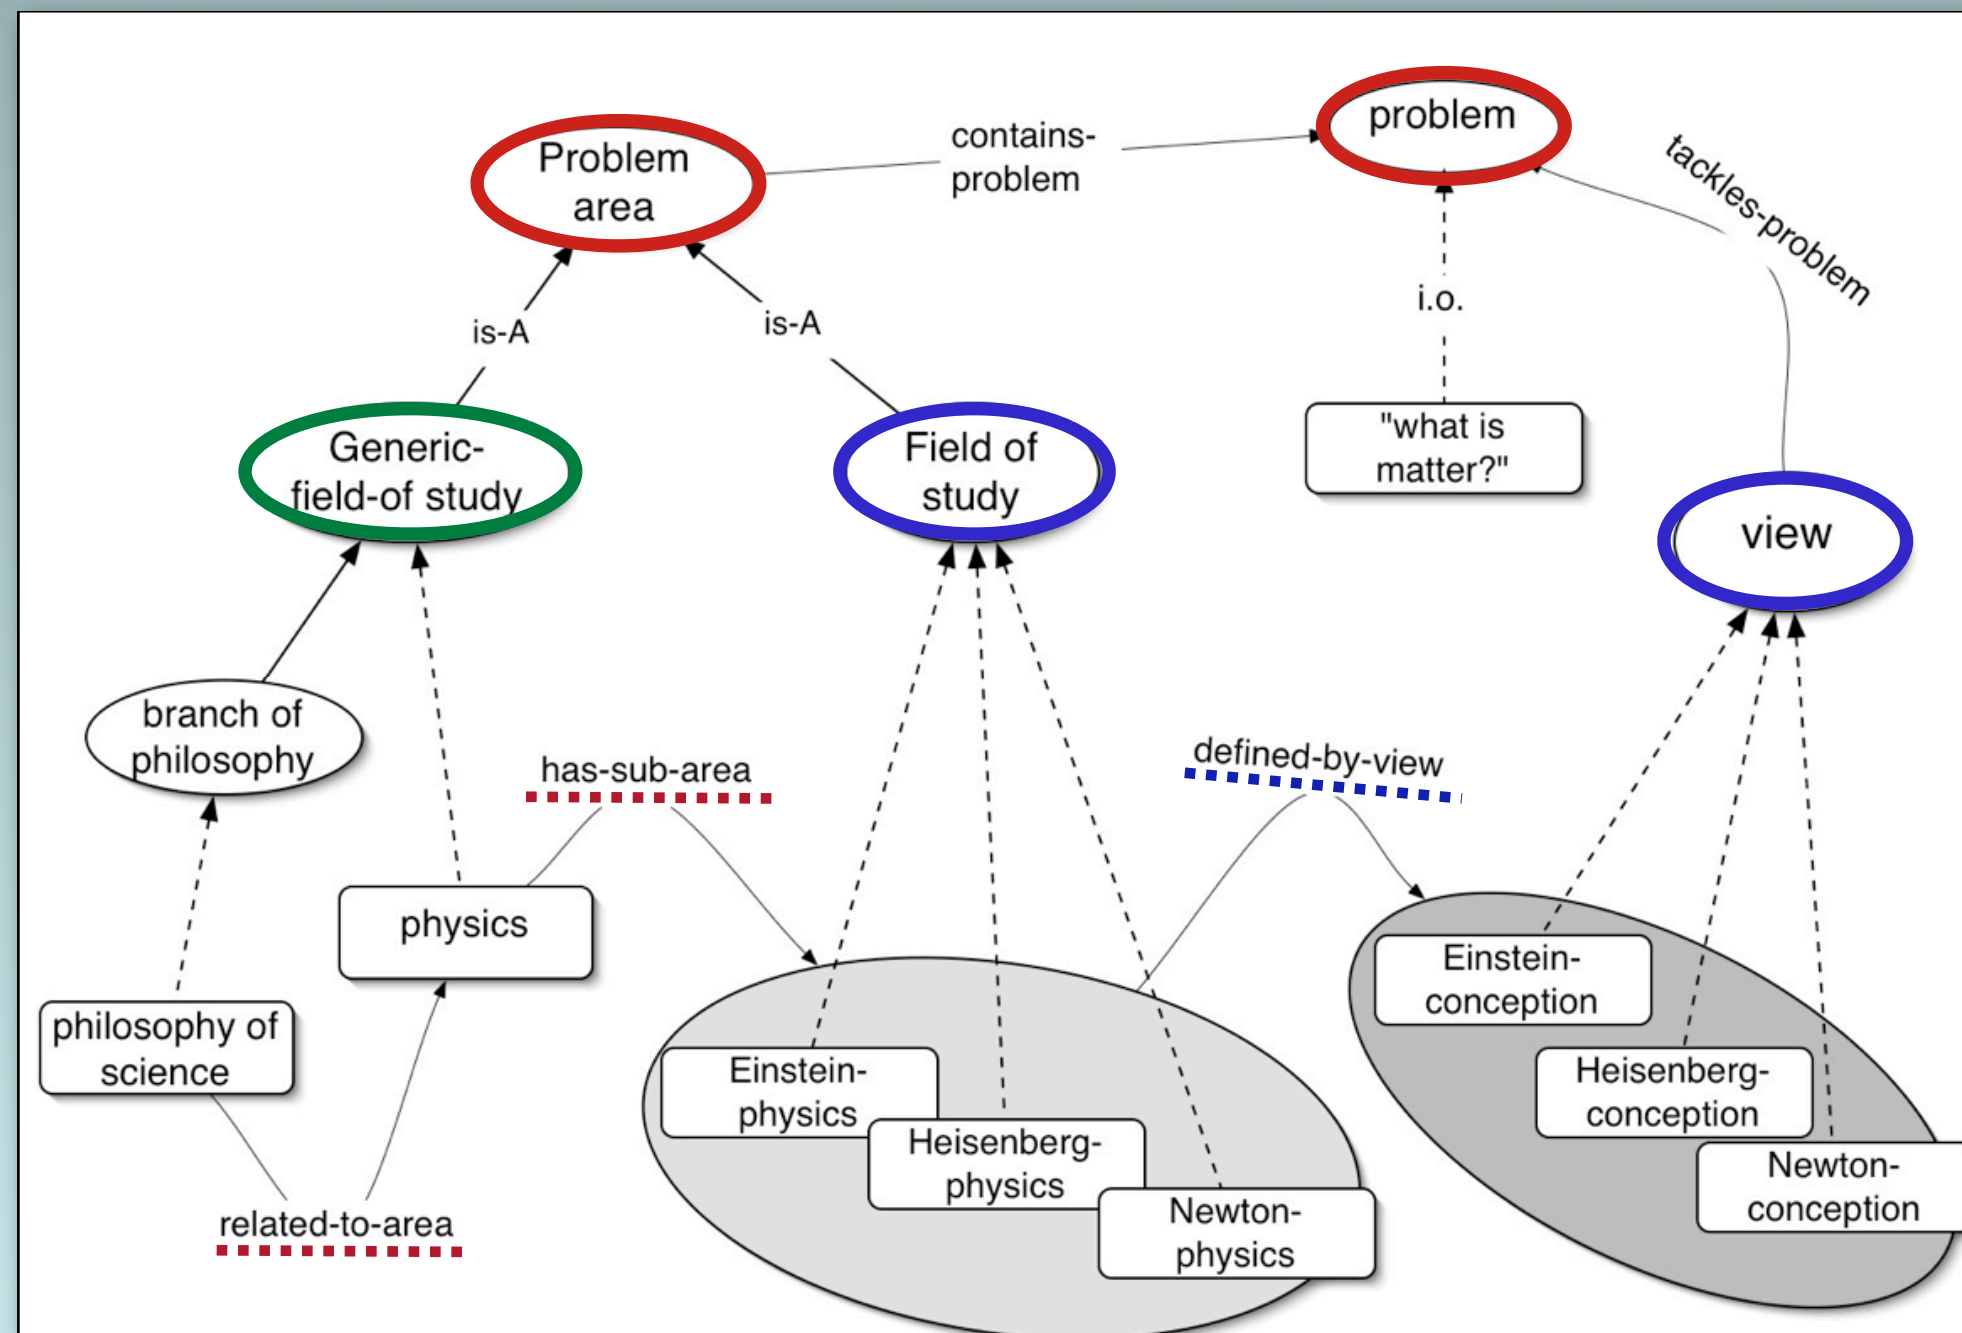

Ex. III: “Problematic” problem-areas..

Lesson learned: modeling patterns for navigation

- Disclaimer: different from “normal” ontology modeling patterns!
 - not focused on architectural issues
 - not involved in the ontology creation process
 - they are not prescriptive!
- Purpose: interpreting a (philosophical) concept/text, so to create *applicable* formal models for navigation
 - they open up new senses which can be used for exploring a subject domain
- Strategy: taking advantage of natural language ambiguities, overlapping word senses, hidden categories in language
 - the granularity of the ontology is crucial!

Key achievements

- New approach for modeling philosophical domain
 - In particular, viewpoints and other ideas
- Implementation includes:
 - Domain model
 - 440 classes (100 cidoc)
 - +15000 instances (at the time of speaking)
 - ~7000 persons related to philosophy
 - ~ 500 ideas mostly related to the first wittgenstein
 - ~ 700 interpretations of ideas and texts
 - ~ 7000 events (mainly teacher/student relationships)
 - PhiloSURFical tool (demonstration available)
 - Supports smart browsing of a philosophical text, tx to the ontology

Conclusions

- Evaluation (ongoing)

- KA experiment
 - how do the classes mirror philosophers' understanding?
- Qualitative evaluation on Philosurfical tool
 - how does the model support interesting navigations?
- ..any hints?

- Future work:

- Build bridges to other sources in the web of data: e.g. Dbpedia
- Make the PhiloSURFical kb available as a sparql endpoint
